

1 (January 7, 2002)  
2 The Contractor may use either fly ash modified concrete (FMC), or latex modified  
3 concrete (LMC) for the concrete overlay. The Contractor shall select one type of  
4 concrete for the overlay, provide a mix for the selected concrete to the Engineer in  
5 accordance with Item 5 of Section 6-09.3(2), and use that type for the total concrete  
6 overlay operation. Use of a combination of types will not be allowed. Use of  
7 microsilica modified concrete (MMC) will not be allowed.
