

1 (April 1, 2002)

2 Barrier delineators shall be placed on the traffic face of the barrier six inches down from
3 the top. Spacing shall be as shown in the plans. Delineator color shall be white on the
4 right of traffic and yellow on the left of traffic. The surface of the barrier where the
5 delineator is applied shall be free of dirt, curing compound, moisture, paint, or any other
6 material that would adversely affect the bond of the adhesive. Install delineators with an
7 adhesive recommended by the manufacturer.
