WSDOT Standard Practice QC 12 (ASA)
Standard practice for evaluation of Aggregate Sources

1. Scope

The standard specifies procedures for approval of aggregate sources. This standard may involve hazardous, operations and equipment. It does not address all of the safety problems associated with their use. It is the responsibility of those using this standard to consult and establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

2. Referenced Documents

2.1. AASHTO Standards

2.1.1. M 6 Standard Specification for Fine Aggregate for Hydraulic Cement Concrete
2.1.2. M 80 Standard Specification for Coarse Aggregate for Hydraulic Cement Concrete
2.1.3. R 18 Standard Recommended Practice for Establishing and Implementing a Quality Management System for Construction Materials Testing Laboratories
2.1.4. T 2 Standard Method of Test for Sampling of Aggregates
2.1.5. T 11 Standard Method of Test for Materials Finer Than 75-µm (No. 200) Sieve in Mineral Aggregates by Washing
2.1.6. T 21 Standard Method of Test for Organic Impurities in Fine Aggregate for Concrete
2.1.7. T 27 Standard Method of Test for Sieve Analysis of Fine and Coarse Aggregate
2.1.8. T 71 Standard Method of Test for Effect of Organic Impurities in Fine Aggregate on Strength of Mortar
2.1.9. T 176 Standard Method of Test for Plastic Fines and Graded Aggregates and Soils by Use of the Sand Equivalent Test
2.1.10. T 84 Standard Method of Test for Specific Gravity and Absorption of Fine Aggregate
2.1.11. T 85 Standard Method of Test for Specific Gravity and Absorption of Coarse Aggregate
2.1.12. T 96 Standard Method of Test for Resistance to Degradation of Small-Size Coarse Aggregate by Abrasion and Impact in the Los Angeles Machine
2.1.13. T 112 Standard Method of Test for Clay Lumps and Friable Particles in Aggregate
2.1.14. T 113 Standard Method of Test for Lightweight Particles in Aggregate
2.1.15. T 303 Standard Method of Test for Accelerated Detection of Potentially Deleterious Expansion of Mortar Bars Due to Alkali-Silica Reaction

2.2. ASTM Standards

2.2.2. C 1293 Standard Test Method for Determination of Length Change of Concrete Due to Alkali-Silica Reaction

2.3. WSDOT Standards

2.3.1. M 41-10 Standard Specifications for Road, Bridge, and Municipal Construction
2.3.2. M 46-01 Materials Manual
2.3.3. WSDOT Test Method T 113 Method of Test for Determination of Degradation Value
3. Terminology
   3.1. AASHTO – American Association of State Highway and Transportation Officials
   3.2. ASA – Aggregate Source Approval database
   3.3. ASR – Alkali Silica Reactivity
   3.4. Department – The Washington State Department of Transportation
   3.5. QAP – Quality Aggregate Program
   3.6. QC – Quality Control
   3.7. QCP – Quality Control Plan
   3.8. SE – Sand Equivalent
   3.9. SPG – Specific Gravity
   3.10. WAQTC – Western Alliance for Quality Transportation Construction

4. Significance and Use
   This standard specifies procedures for approval of aggregate sources.

5. Sources requesting entry into the Quality Aggregate Program
   5.1. Submit Quality Control Plan per QC 11 and payment.
      5.1.1. To initiate submittal process contact the ASA Engineer at 360-709-5442
      5.1.2. Payment may be by check to P.O. 47365 Olympia, WA 98504-7365 or by credit card through
      5.1.3. Once payment is received and processed the QCP will be reviewed.
   5.2. If the QCP is not accepted it will be returned with comments noting concerns and deficiencies where it
   does not meet the requirements of QC 11
   5.3. If QCP is accepted, and payment is received the Department will sample the stockpile of Materials
   and test materials for Washington Degradation, Los Angeles wear, Specific gravity, and SE or ASR if
   applicable. The stockpile must be at least 10 tons.
   5.4. If passing results are obtained the source will be listed in the ASA.
   5.5. The aggregate source will follow their accepted QCP and submit, on annual basis, to be received by
   January 31st, to the Department, by email to ASA2@WSDOT.WA.GOV. The data to be submitted is LA
   Wear and SPG. All other QC tests will be kept at the Aggregate source suppliers QC office, send copies
   of these test to the Project Engineer Office, when supplying WSDOT Contracts.
   5.6. The Aggregate source shall contact the Department, State Materials Laboratory to make a request to be
   resampled on the interval established by the Department, up to a maximum interval of five years per
   section 5.4.
   5.7. The sources listing on the ASA will be suspended, if:
      5.7.1. If the data submitted under the QCP does not indicate compliance with Standard Specifications
      Section 9-03.
      5.7.2. If the Departments’ tests do not indicate compliance with Standard Specifications Section 9-03.
      5.7.3. If the aggregate source does not make payment for renewal sampling at testing.
6. Aggregate Sources not in QAP

6.1. To initiate submittal process contact the ASA Engineer at 360-709-5442

6.2. Payment may be by check to P.O. 47365 Olympia, WA 98504-7365 or by credit card through website http://www.wsdot.wa.gov/Business/MaterialsLab/Materials-Evaluation-Program.htm

6.3. If payment is received the Department will sample the stockpile of Materials and test materials for Washington Degradation, Los Angeles wear, Specific gravity, and SE or ASR if applicable. The minimum 10 ton stockpile is required for the department to perform sampling and testing.

6.4. If passing results are obtained the source will be listed in the ASA, for maximum of two years.

6.5. In order to continue listing on ASA aggregate source must enter the QAP.
