William Francis, Vice President, Burlington Northern R.R.
Sam Guy, Senator, The State Senate
Lawrence Houk, Vice President, Lockheed Shipbuilding
Charles H. Knight, President, Concrete Technology
Michael Murphy, President, Central Pre-Mix Concrete
Richard S. Page, President, Washington Roundtable
James D. Ray, Senior Manager, IBM Company

Universities
C.J. Nyman, Associate Provost for Research, Wash. State Univ.
Gene L. Woodruff, Vice Provost for Research, Univ. of Washington

Washington State Department of Transportation
Duane Berentson, Secretary

WSDOT Research Executive Committees
A.D. Andreas, Chair, Deputy Secretary for Transportation
E.W. Ferguson, Administrator, District 4
Robert C. Schuster, Assistant Secretary for Highways
James Sainsbury, Acting Assistant Secretary for Marine Transportation
James P. Toohy, Assistant Secretary for Planning, Research & Public Transportation

WSDOT Research Technical Committees
Highway Operations and Development
Roland Cook, Chairman, District 2 Administrator

John Aasen, District 4 Project Engineer
William P. Carr, Associate Research Director
Rich Darnell, District 5 Maint. & Operations Engineer
C. Stewart Clower, Bridge/Structures Engineer
Wayne Gruen, State Traffic Engineer
Kern Jacobson, District 1 Public Transportation and Planning Engineer
Stan Moon, Location/Design Engineer
Ed Schlecht, Construction Engineer - Paving
Don Senn, District 2 Location/Construction Engineer
Dick Shroll, District 6 Maintenance Superintendent
John Stanion, Assistant Professor, University of Washington
Ken Thomas, Operations Engineer, Bellingham Public Works Dept.

Materials and Product Development
Dee Vandehey, Chairman, State Construction Engineer
Keith W. Anderson, Research Specialist
Bill Beeman, District 5 Administrator
Jerry Higgins, Assistant Professor, Washington State University
Newton Jackson, Pavement/Soils Engineer
Alan King, Public Works Director, Okanogan County
Bob Krier, Bridge Operations Engineer
Art Peters, Materials Engineer
Bob Spratt, District 2 Maintenance Engineer
John Strada, Construction Engineer - Grading

Planning and Multimodal
George Smith, Chairman, Manager, Public Transportation Office

Ron Anderson, Manager, District 6 Management Services
Ken Casavant, Professor, Washington State University
King Cushman, Director, Pierce County Transit Development
John Doyle, Manager, Economy Branch
Ken Gupta, Manager, Transportation Data
Jerry Lenzi, Multimodal Transportation
Don Tranum, District 6 Administrator

WSDOT Research Implementation Committees
Stan Moon, Chairman, Location/Design Engineer

Kern Jacobson, District 1 Public Transportation and Planning Engineer
Bob Krier, Bridge Operations Engineer
Dennis Ingham, Highway Maintenance Engineer
Stan Moon, Location/Design Engineer

2. Government Accession No.  

3. Recipient's Catalog No.  

4. Title and Subtitle  
Database Management Systems

5. Report Date  
July 1986

6. Performing Organization Code  

7. Author(s)  
Sheryl Sannes

9. Performing Organization Name and Address  
Washington State Transportation Center  
More Hall - FX-10  
University of Washington  
Seattle, WA 98195

10. Work Unit No.  

11. Contract or Grant No.  

12. Sponsoring Agency Name and Address  
Washington State Department of Transportation  
Transportation Building KF-01  
Olympia, WA 98504

13. Type of Report and Period Covered  
Program Documentation

15. Supplementary Notes  
Study was conducted in cooperation with the U.S. Department of Transportation, Federal Highway Administration

16. Abstract  
The database management system was created in DBase III Plus. Included in this database is all research project historical and administrative information necessary to generate budget, expenditure, and management reports. A menu system was created to enable the user to view and update the database information, update and print all reports, and enter information on new projects.

17. Key Words  
Database, DBase III, Microcomputer

18. Distribution Statement  

19. Security Classif. (of this report)  
Unclassified

20. Security Classif. (of this page)

INTRODUCTION

To get into Dbase:

1. At the DOS "C:" prompt type:
2. At dBase "." prompt type:
3. This will give you the main menu
4. Now go from here!
REPORTS CONTAINED IN THE DATABASE FILES

1. Monthly Expenditure Report
2. Proposal Development Worksheet
3. Project Management Report
4. Project Implementation/Evaluation Report
5. Fy86 Work Program Revisions
6. Research Program by Functional Area
7. Research Program by HPR/MVF
8. Principal Investigator’s List
DOCUMENTATION

MAIN.PRG

This program was written to compare the existing information in the database against the new information entered. If the fields are different then both of them will be printed out.

For every field in the DBF files IDENTITY and DEFINITY, there is a comparison made in Main.prn. When a user enters new information it compares the information to the previous information and if it is different it prints all the information and then replaces the old with the new.

PRINT.PRG

This program is a menu which appears on the screen. It lists all the reports which a user can print. If you ever add new reports to the database you will have to create an .FRM file and put the name of the .FRM file into this program.

DBMENU.PRG

This program produces the first menu the user sees on the screen; with each option the user chooses it directs the user to a new program. If you choose "update" you are directed to the Update.prn. If you choose "print" you are directed to Print.prn. If you choose "view" you are directed to the BROWSE command. If you choose "enter" you are directed to the Main.prn. Type "Q" to exit the program.

CHECK.PRG

This program locates the item number the user enters and searches for it in the old data. If it is found, the user will only be able to update; if it is not found then the user enters in new data. The new data is then appended into the old database.

If new fields are added to IDENTITY.DBF or DEFINITY.DBF then each field will have to be added to this program also.

UPDATE.PRG

This program is called from Dbmenu.prn. It allows the user to update each report. A separate program has been written for each report. The user can update individual reports because of this.
DIRECTORY OF FILES

Format (.frm) files
A. BUDGET = format file for the budget report
B. SHE1 = format file for the equipment inventory
C. PI = format file for the pi report
D. BUDGET = data entry screen for HPR/MVF work program
E. EXPEND = data entry screen for monthly expenditure report
F. MGMTUPDT = data entry screen for project management report
G. DEVELMT = data entry screen for proposal development worksheet

Report form (.frm) files
A. DEVELOPM = proposal development worksheet
B. PILIST = report form for P.I. list
C. HPRBUDG = research program by HPR/MVF
D. HPRSUMM = summary sheet for HPRBUDG
E. MGNTRPT = report form for management report
F. MOEXPEND = report form for monthly expenditure report
G. SHE1 = inventory report form
H. HPRALPHA = research program worksheet sorted by functional area
I. ALPHASUM = summary sheet for HPRALPHA

Command (.pro) files
A. DBMENU = program for main mainu
B. IDENTIFY = program for the main database
C. MAIN = program to check if user has entered new information
D. SHE1 = program for the inventory
E. UPDATE = program to let the user update
F. PRINT = program to let the user print
G. MGNTRPT2 = print project management report
H. DEVEL = print proposal development worksheet
J. CHECK = program which checks old data against new data
K. UPDATE_M = update project management report
L. UPDATE_B = update research program reports
M. UPDATE_D = update proposal development worksheet
N. PIRPT = print principal investigator list
O. HPRALPHA = print research program by functional area
P. MTHLYRPT = print monthly expenditure report
Q. MOEXPEND = update monthly expenditure report
Database (.DBF) files

A. IDENTIFY = contains all of the data
B. MAILLABEL = mail label database
C. SHE1 = inventory database
D. IDENTIFY = second database for IDENTIFY.DBF
E. HE = second database for the inventory

Index (.NDX) files

A. ITEMSORT = by item number
B. FUNCSORT = by functional area and project type and project title
C. PISORT = by pi name and project title
D. STATUSOR = status and functional area and project type and project title
E. HPRSORT = by HPR_MVF and fund type and item number
F. SHE1 = index for the inventory database
