

Disable Reading Mode in Word 2013 & Word 2016 for PS&E

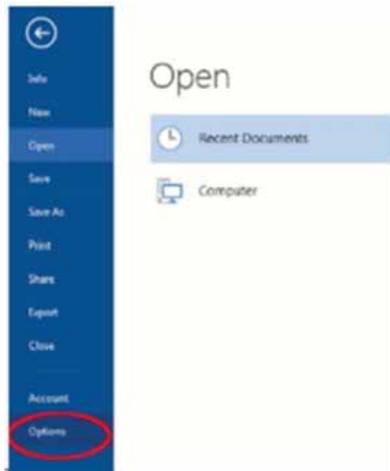

The PS&E program has been tested for use in Word 2013 and Word 2016. There are a few settings that must be changed if you are using these versions.

Word PS&E will generate errors on open if

“Open e-mail attachments and other uneditable files in reading view” or

“Show the Start screen when this application starts” are checked.

To verify they are unchecked open a word document then go to File – Options

Then select General. Uncheck “Open E-Mail attachments and other un-editable files in reading view”
