LEGISLATIVE HIGHWAY NUMBERS WITH CORRESPONDING SIGN ROUTE NUMBERS...	7
SIGN ROUTE NUMBERS WITH CORRESPOND- ING LEGISLATIVE HIGHWAY NUMBERS....	24

CONTROLLING STATUTES

This booklet has been published principally for use by those in State Government who desire or need a cross reference among the various state highway classifications. The three classifications now in use are covered by the following statutes:

R.C.W. 47.04.020: Prior to 1963 this law had set up the primary and secondary highway systems which have been used since 1937.

In 1963, the Legislature modified this section to change the numbering of state highway route signs for a clearer understanding of the routes, but it also retained the primary and secondary highway system.

R.C.W. 47.05: This law provides for all state highways, other than Interstate, to be classified into four functional classes, i.e., Principal, Major, Collector and Other. These classifications have been set up as a rational basis for selection of projects according to factual need.

EXPLANATORY INFORMATION

Primary and Secondary Highways: The identification of primary and secondary highways is covered by R.C.W. 47.16 and 47.20 respectively, and are the designated legislative highway systems.

These are abbreviated through the booklet as: PSH and SSH.

The double letters following a primary state highway number are used by the Highway Department to identify branch routes.

Sign Routes: The numbering system follows the system employed by the Federal Government in the assignment of U. S. and Interstate routes: that is, odd numbers indicate general north-south routes; even numbers indicate general east-west routes.

U. S. and Interstate route numbers retain their identities as Sign Routes.

In general, it is essential to carry only one SR number to identify a section of highway. Where two or more SR numbers are assigned to the same section, it is logical to refer only to the number outside the parentheses in correspondence and on plans. The numbers inside the parentheses, in addition to the number outside, will be used for signing the highway.

On U. S. numbered routes which may become or be replaced by an Interstate route, the U. S. number will apply to the existing route (marked X) and the Interstate Number will apply to the new location (marked N) for the Interstate route.

“X” and “N” Are For Identification Purposes Only And Should Not Be Considered as a Prefix

Functional Classes: These are abbreviated as follows:

Interstate	I
Principal	P
Major	M
Collector	C
Other	O

This Booklet is Subject to Change

LEGISLATIVE HIGHWAY NUMBERS WITH CORRESPONDING SIGN ROUTE NUMBERS

<i>Legis- lative Number PSH or SSH No.</i>	<i>DESCRIPTION</i>	<i>Sign Route (SR) No.</i>	<i>Func- tional Class</i>
