Airport and Compatible Land-Use Program Guidebook

Public comment form

Your comments are important, as they will be used by WSDOT to fine-tune the guidebook prior to its final adoption. Please take a few moments to share your thoughts and suggestions.

How will you use the guidebook as a land-use planner, local decision maker, airport sponsor or aviation advocate?

What parts of the guidebook do you find most useful? Least useful?

Does the handbook define the six-step compatibility planning process well? Why or why not?

Are the guidelines user-friendly and easy to read? What improvements should be made?

If you could include something additional in the manual, what would it be? If you could delete something in the manual, what would it be?

General Comments:

Request a Briefing for Your Group

WSDOT Aviation welcomes opportunities to give briefings to interested agencies or groups. Briefings are an ideal way for WSDOT to enhance outreach, answer key questions and obtain important feedback.

Would you like to schedule a briefing for your group?
