Project Description

I-90 east of Snoqualmie Pass experiences stop-and-go traffic conditions due to increasing traffic volumes and collisions, including collisions with wildlife. This project will rebuild I-90 as a six-lane freeway for two miles from near Keechelus Dam to the Stampede Pass interchange, realigning the roadway, extending chain-up areas, stabilizing rock cuts, replacing deteriorated pavement upgrading drainage systems, and improving signing and other safety features. WSDOT will minimize animal/vehicle collisions by building a wildlife bridge over I-90 east of Keechelus Dam. Benefits include better traffic flow, smoother pavement, reduced hazards due to rockfall, fewer animal/vehicle collisions, more efficient chain-up operations, and improved sight distance.
