Before removing the Alaskan Way Viaduct, crews will shift surface Alaskan Way to the west side of the viaduct. This will keep the road open during the upcoming SR 99 closure, viaduct removal and the City’s construction of a new Alaskan Way in the footprint of the viaduct. The traffic switch will occur this fall.

Note: The below map does not include the Alaskan Way Viaduct. During viaduct removal, Alaskan Way may be reduced to one lane in each direction with detours for bicycles and pedestrians.
