Prime Contractor / Design-Builders
American Bridge Company

X Ordered by Engineer under the terms of Section 1-04.4 of the Standard Specifications or the RFP
☐ Change proposed by Contractor / Design-Builders

Evolution & Description Of Change
Attached for review and further processing is PE recommended Change Order No. 7R1. This change order addresses time by paying for schedule recovery for Work performed on premium time on weekends for the issues described below. Cost Impacts resulting from increased or decreased work associated with these changes will be addressed on separate change orders.

This Contract provides for the replacement of 32 anchor cables on the I-90 Floating Bridges and includes a weather work window of April 1 to September 30 of any given year.

Issue #1: Unconstructable Wire Stand Socket Detail
The Contract specifies that anchor cables shall be socketed in the vertical position. On April 17, 2018, the Contractor discovered that vertical socketing was not possible due to dimensions of the wire strand socket and pontoon port cover being inconsistent with what is shown in the Contract Plans. As a result of this change the schedule was impacted 6 working days.

In order to keep the project on schedule, the Contractor re-sequenced their Work to Bridge 90/25S and began Work on Anchor Cable A-SW. This resulted in a one (1) working day delay for barge movement and reconfiguration.WSDOT’s processing time for the new horizontal socketing plan resulted in a four (4) working day delay during which the Contractor was on standby. In addition, the new socketing procedure resulted in a learning curve delay of one (1) working day for Anchor Cable F-N.

Issue #2: Excavation Issues at Anchor Cables G-S
After Anchor Cable 90/25N C-S was completed, the only transverse cable on the main barge was Cable G-S. Anchor cable G-S required extensive excavation beyond the limits identified in the contract requiring additional time. The main barge crew was on standby for six (6) working days during the excavation of the eyebar for this cable. The replacement of G-S was completed on June 6, 2018.

Issue #3: Excavation Issues at Anchor Cable I-S
The next available anchor cable to install after the installation of G-S, was Anchor Cable I-S, which also required extensive excavation to expose the eyebar beyond the limits identified in the contract. The additional excavation to expose the eyebar for Anchor Cable I-S was ongoing concurrent to the replacement of G-S, but was not completed until June 13, 2018. The main barge crew was on standby for two (2) working days during the excavation of the eyebar at cable I-S. Since the excavation was taking longer than expected for cable I-S, the Contractor re-sequenced their schedule to begin Work on Anchor Cable P-S next. This resulted in a delay of one (1) working day on June 11, 2018 to reconfigure and move the barge. This removed the remaining excavation work for cable I-S from the critical path of the project schedule and the main barge crew was able to continue on Anchor Cable P-S.

In summary, the wire strand socket plan error and the related consequent events as well as the excavation issues at Anchor Cables G-S and I-S resulted in a total delay of 15 working days. Please see the attached Time Impact Analysis for additional information.

In order to complete the Work by September 30, 2018 as specified in the Contract Provisions, WSDOT and the Contractor agree to proceed with a 15-day schedule recovery plan to mitigate the accrued 15-day delay. The plan provides for Work to be completed on select Saturdays and Sundays on premium time. On August 22, 2018, WSDOT and the Contractor agreed to an amount of $803,600.00, which is to be paid at a daily rate of $42,793.52 for 8 Saturdays and $65,893.12 for 7 Sundays.

**Basis of Cost & Justification:**

New item “CO#7R1 Schedule Recovery Saturday Premium Pay” shall be paid at the agreed price of $42,793.52 per day.

New item “CO#7R1 Schedule Recovery Sunday Premium Pay” shall be paid at the agreed price of $65,893.12 per day.

WSDOT calculated an independent estimate in the amount of $824,060.99, which is $43,883.11 for 8 Saturdays and $67,570.87 for 7 Sundays. On August 22, 2018, WSDOT and the Contractor agreed to an amount of $803,600.00, which is $42,793.52 for 8 Saturdays and $65,893.12 for 7 Sundays. Please see the attached cost estimate for the basis and justification of cost.

The net amount for this change order is estimated to be $803,600.00.

**Contract Time:**

This change order provides for Work outside of the normal scheduled work week, so no additional working days were required. As a result, it is mutually agreed that an extension of time will not be granted as a result of this change order.

**Prior Approvals:**

Kevin Waligorski, Asst. State Construction Engineer, gave written approval for this change August 7, 2018. Cathy Arnold, NWR Engineering Manager, gave written approval for this change July 26, 2018. Dave Lindberg, Project Engineer, gave verbal approval for this change July 12, 2018.

REPRESENTING
All work, materials, and measurements to be in accordance with the provisions of the Standard Specifications and Special Provisions for the type of construction involved.

This contract is revised as follows:

DESCRIPTION
This change order provides compensation for Work performed on premium time for days outside of the normal scheduled work week. Premium time consists of overtime and double time worked above standard time by the Prime Contractor and Subcontractors.

MEASUREMENT AND PAYMENT
New item "CO#7RL Schedule Recovery Saturday Premium Pay" shall be paid at the agreed price of $42,793.52 per day.

New item "CO#7RL Schedule Recovery Sunday Premium Pay" shall be paid at the agreed price of $65,893.12 per day.

CONTRACT TIME
This change order work did not affect the critical path and no additional working days were required for this Work. As a result, it is mutually agreed that an extension of time will not be granted as a result of this change order and a written time impact analysis is not required.
