Please list all highways and mileposts within your department's jurisdiction/coverage area:

Highways	Beginning MP	Ending MP	Highways	Beginning MP	Ending MP

The maximum weight a firefighting apparatus may weigh is 50,000 pounds on the tandem axle set and 31,000 pounds on a single drive axle, and may not exceed 670 pounds per inch width of tire. The maximum weight limit must include the weight of a full water tank, if applicable, all equipment necessary for operation, and the normal number of personnel usually assigned to be on board, or four personnel, whichever is greater. At least four personnel must be physically present at the time the apparatus is weighed.

*** When applying for a permit, a current weight slip from a certified scale must be attached to the department's application form. ***
