Dear Ms. Hammond:

The Arboretum Botanical Garden Committee (ABGC) would like to thank you for the incredible work your WSDOT Team has done in the development of the Arboretum Mitigation Plan.

It has been a total pleasure working with Julia Meredith, Rob Berman, Katie DeLeuw, Jenifer Young, Kerry Ruth and other staff members. They have been so professional and they have worked tirelessly on details, listened carefully to so many diverse comments and suggested creative solutions to some difficult issues on the SR 520 mitigation issues. They have also been very patient throughout the process.

As the Arboretum and Botanical Garden Committee, we represent the widely different interests of the city of Seattle, the University of Washington, the Arboretum Foundation and the State of Washington. As individuals, we represent an even wider diversity. Nevertheless, your staff worked very closely with us and we are pleased with the progress we have made over the last several months.
We look forward to a continued excellent working relationship with WSDOT as we complete the Memoranda of Understanding, the Memorandum of Agreement and the implementation of the mitigation plan.

Sincerely,

Barbara Wright, Chair
Arboretum Botanical Garden Committee

Cc: Arboretum Botanical Garden Committee Members
July 19, 2011

Mr. Donald Harris, Property & Acquisitions Services Manager
Seattle Parks Department
100 Dexter Avenue North
Seattle, WA 98109

Dear Mr. Harris:

This letter memorializes WSDOT’s intent to convey property in the area known informally as the “WSDOT peninsula” to the City of Seattle as mitigation for impacts of the SR 520, I-5 to Medina: Bridge Replacement and HOV Project. Although the legal details, structure, and quantity of the property transfer are still being worked out, this serves as a statement of our commitment to identify the transfer mechanism when these issues have been resolved.

The property known as the WSDOT peninsula (shown on the attached map) is approximately 26 acres in size and is contiguous with the northwestern boundary of the Washington Park Arboretum. It consists of several parcels that WSDOT (then the State Highway Department) acquired from the Arboretum in the early 1960s, when SR 520 was being planned and built. The site contains both upland and aquatic area. The property currently contains active freeway ramps connecting SR 520 to Lake Washington Boulevard, as well as unused ramps originally planned for the R.H. Thomson Expressway.

Property ownership in this area is complex. Research conducted by the state Attorney General’s Office indicates the WSDOT peninsula parcels are currently owned in fee by WSDOT and are restricted in use to highway purposes. Environmental mitigation required for a highway project is considered a highway use and land conveyed to satisfy such an environmental mitigation obligation would not require monetary compensation. However, the value of the land conveyed must be equivalent in value to the mitigation obligation being satisfied. To the extent the value of the property to be conveyed exceeds the value of the mitigation obligation, WSDOT would need to determine the excess property is no longer needed for a highway purpose and the grantee would be required to pay the fair market value of that property to WSDOT.

As you know, WSDOT’s wetland mitigation plan for the I-5 to Medina project currently proposes the use of the peninsula area to provide approximately 11 acres of wetland creation and enhancement. This will satisfy a portion of WSDOT’s regulatory obligations for mitigation under state and federal law. As a result, the property used for wetland mitigation may be conveyed to the Seattle Parks Department at no cost, provided a
conservation easement is established for the wetland site and the Seattle Parks Department maintains the wetland in perpetuity.

The remaining portion of the peninsula is not suitable for wetland mitigation. However, because the project would acquire Section 4(f) properties under the jurisdiction of Seattle Parks that have not already been mitigated through the Section 6(f) process, the opportunity exists to use land on the peninsula to mitigate for the 4(f) impact to these properties. Accordingly, WSDOT is developing appraisals of both the Section 4(f) properties and the peninsula property to determine what proportion of the peninsula property could be appropriately used as mitigation, based on a comparison of the properties’ relative values.

We anticipate that the appraisals will be completed by fall 2011. At that time, we will meet with you to discuss the property available to be used as mitigation and the appropriate process and timing for the transfer. We also anticipate discussing the commitments made in the Arboretum Mitigation Plan in the context of this additional mitigation being provided. In the meantime, if you have any questions or need more information to complete your review, please call me at (206) 770-3568 or e-mail me at meredjl@wsdot.wa.gov.

Sincerely,

[Signature]

RE: SR 520, I-5 to Medina Bridge Replacement and HOV Project
Compliance with Transportation Planning Requirements

Dear Mr. Everett:

This letter serves to document Washington State Department of Transportation’s (WSDOT) compliance with regional transportation planning requirements (23 CFR § 450), and in particular those requirements pertaining to the SR 520, I-5 to Medina Bridge Replacement and HOV project (I-5 to Medina project).

According to FHWA’s guidance, proposed transportation projects within metropolitan planning areas must meet the following specific criteria:

1. The project or phases of the project within the time horizon of the Metropolitan Transportation Plan (MTP) must be included in the fiscally constrained MTP.

2. The project must be in the fiscally constrained Transportation Improvement Program (TIP). If the project is phased, at least one phase of the project must be in the TIP.

3. Full funding must be reasonably available for the completion of all phases of the entire project within the time period available for completion of the project [23 CFR § 450.324(h)-(i)].

WSDOT is in compliance with all of these requirements.

1. Metropolitan Transportation Plan (MTP). The Puget Sound Regional Council’s (PSRC) MTP is titled Transportation 2040. Appendix M of the MTP document (enclosed here as Exhibit A) includes the full I-5 to Medina project in the fiscally constrained portion of the plan (T2040 ID #’s 4250 and 4251). The cost estimate value for the I-5 to Medina project in the NEPA Final Environmental Impact Statement (FEIS) is $3.4B (rounded). PSRC’s MTP and Transportation Improvement Program (TIP) are consistent with the FEIS, excluding deferred sales tax. The TIP (T2040 ID #’s 4250 and 4251) total $2.54B (rounded) is the result of standard PSRC practice to adjust project estimates in the MTP from year of expenditure to normalize in 2008 dollars.
2. **Transportation Improvement Program (TIP and STIP).** The fiscally constrained PSRC TIP and WSDOT Statewide Transportation Improvement Plan (STIP), as amended in June 2011, include multiple phases of the I-5 to Medina project. The following phases are included as TIP Project WD520-1A: preliminary engineering; right-of-way; and the first stage of construction (the Evergreen Pt. Floating Bridge and Landings). Enclosed here as Exhibits B and C. The cost estimate values in the TIP and STIP are consistent with the FEIS as described in the above clarification.

3. **Full Funding Reasonably Available.** Full funding for the I-5 to Medina project is reasonably expected through state and federal sources. WSDOT has been proactive in developing funding strategies for the I-5 to Medina project. The 2008 SR 520 Finance Plan identified full funding for the project through a variety of sources. These include state motor vehicle excise taxes, “pay as you go” toll revenue, and bonded toll revenue, as well as Federal formula funds and bonded funds (GARVEE bonds). The SR 520 Legislative Workgroup, convened in 2009 under Engrossed Substitute House Bill 2211, updated these recommendations in its December 2009 final report. In 2010, a tolling implementation committee led by Governor Gregoire confirmed that there are viable financing alternatives for the full I-5 to Medina project.

In July, 2011 the Governor announced the formation of the Connecting Washington Task Force, which is charged with developing a 10-year investing and funding plan for the state’s transportation system and presenting it to the 2012 Legislature. Funding the SR 520 Bridge (I-5 to Medina project) is one of identified priorities of the plan. WSDOT continues to work with the Governor, bipartisan members of the legislature, the PSRC, and the Seattle City Council and departments to ensure multilevel support.

Support for the project is further demonstrated by the April 28, 2011 vote of the PSRC to endorse the next step of the Floating Bridge and Landings phase of the I-5 to Medina project. The PSRC Executive Board, comprised of 32 elected officials from around the region, voted 31 -1 in support of moving forward.

For these reasons, WSDOT believes that the SR 520 Program is in compliance with FHWA transportation planning requirements. Please do not hesitate to contact me if you have any questions.

Sincerely,

Julie Meredith, P.E.
SR 520 Program Director

Description:

The SR 520 Eastside HOV lane system is incomplete, located only on the outside westbound shoulder west of I-405. The right side shoulder was restriped to serve as the transit lane and cannot safely carry the high volumes that other HOV lanes carry. This project will reconstruct the SR 520 corridor from Medina to 108th Avenue. (A separate construction project will reconfigure the existing HOV lanes east of I-405 to the inside.) The result will be a six-lane corridor including two HOV lanes. Commuters will benefit from better transit reliability and improved travel times between Seattle and the Eastside. Completion of the SR 520 Environmental Documentation from I-5 to Medina and construction from I-5 to the Floating Bridge is included in 852002W. Construction of the Evergreen Point Floating Bridge and Landings is included in 852004B. Construction of pontoons for catastrophic failure of the Floating Bridge is included in 852003A. This project is eligible for Advance Construction.

**First Year Programmed:** 2010  
**WSDOT PIN:** 852021A  
**Totals:** $0  
**Phase Tota:** $14,500,000  
**Year of Expenditure for Est. Project Cost:** 2013  
**Estimated Total Project Cost:** $14,500,000

**Federal Aid/FTA Grant Number(s):**

**Functional Class:** Principal Arterial - Expressway OVER 5,000 area  
**Location:** SR 520: Bear Creek Basin  
**Improvement Type:**  
**Regionally Significant:** No  
**Environmental Status:** EA

**MTP Status:** Exempt  
**MTP Reference(s):** N/A

**Description:**
This project is part of the SR 520/Medina to SR 202 Vicinity - Eastside Transit and HOV Project. WSDOT has designed that project to avoid and/or minimize the effects on wetlands to the greatest extent practicable. Total avoidance is not possible due to the location of existing road rights of way and safety and design constraints. This project will provide compensatory mitigation at a farm site in the Bear Creek basin, which will include rehabilitation of wetlands and upland forest and shrub communities. Completion of the SR 520 Environmental Documentation from I-5 to Medina and construction from I-5 to the Floating Bridge is included in 852002W. Construction of the Floating Bridge and Landings is included in 852004B. Construction of pontoons for catastrophic failure of the Floating Bridge is included in 852003A.
Jurisdiction: WSDOT SR-520 Bridge Replacement & HOV Project Office

Project Number: WDUU-35
Title: SR-520 Pontoon Construction Project

First Year Programmed: 2007
WSDOT PIN: 852003A

Federal Aid/FTA Grant Number(s):

Functional Class: Principal Arterial - Expressway OVER 5,000 area

Location: Grays Harbor County and City of Tacoma

Est. Total Project Cost: $770,163,388

MTP Status: Exempt

Description:
The SR 520 Floating Bridge is vulnerable to windstorms and risk of collapse if not replaced. This project advances pontoon construction to restore the SR 520 Evergreen Point Floating Bridge in the event of a catastrophic failure. If the Evergreen Point Bridge were to fail, the department would be prepared with pontoons to replace the floating section of the SR 520 bridge in a timely manner. If the SR 520 bridge does not experience catastrophic failure, the pontoons would be stored and be used for the planned replacement of the SR 520 bridge. The SR 520 corridor from I-5 to Medina is included in 852002W. The SR 520 Corridor from Medina to SR 202 is included in 852021A.
