**Property appears to meet criteria for the National Register of Historic Places:** Yes

**Property is located in a potential historic district (National and/or local):** No

**Property potentially contributes to a historic district (National and/or local):** No

**Statement of Significance:**

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1906 in an area located adjacent (to the west) of the potential Montlake historic district. The property appears eligible for listing in the NRHP as a contributing element to the Montlake NRHP-eligible historic district.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1906 in the Montlake neighborhood. The residence has good integrity and is a representative example of the early twentieth century houses that make up the historic district. The house embodies the distinctive characteristics of Craftsman style architecture and is an excellent example of the style in a transitional period. Based on our evaluation, the property appears eligible for listing in the NRHP as a contributing element to the Montlake NRHP-eligible historic district.

**Description of Physical Appearance:**

The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Craftsman style. It has a steeply pitched front-gable roof with composition asphalt shingles and exposed structural elements. The exterior walls are clad with coursed wood shingles. The primary facade is symmetrically divided and two bays wide. The fenestration consists of original wood windows throughout the residence.

Property appears to meet criteria for the National Register of Historic Places: Yes

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1956 in an area located adjacent (to the west) of the potential Montlake historic district. The building has good integrity, but is outside the suggested historic district boundaries and its age is beyond the period of significance for that district (1905 to 1952), which would qualify it as an intrusion if it were included within the boundaries. The area where this building is located contains much new construction, and few of those extant structures that date from before 1971 are architecturally distinguished. This building and its immediately neighboring structures do not convey the historic significance of the community. Therefore, there is no potential for a historic district here. The individual property, however, does embody the distinctive characteristics of the Modern style and could be the design of a master architect. Based on our evaluation, the property appears individually eligible for listing in the NRHP under Criterion C for its architectural design.

Description of Physical Appearance:
The property contains a three-story multiple-family apartment building with a rectangular plan and steel frame construction. The building was originally designed in the Modern style. It has a flat roof with a vertically projecting stairwell enclosure. The exterior walls are clad with smooth toweled stucco. The primary facade is asymmetrically divided into four sections. The fenestration consists of metal windows throughout the building.

**Engineer:**

Property appears to meet criteria for the National Register of Historic Places: Yes

Property is located in a potential historic district (National and/or local): Yes - National

Property potentially contributes to a historic district (National and/or local): Yes - National

**Statement of Significance:**

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1965 in the Montlake neighborhood. The residence’s construction falls outside the period of significance for the proposed Montlake historic district. However, it has good integrity and is singularly excellent example of the Modern style from the mid 1960s. It appears to have been the work of a master architect and possesses a degree of high artistic value. Based on our evaluation, the property appears individually eligible for listing in the NRHP under Criterion C for its architectural style and association with a recognized master architect.

The Montlake neighborhood area is generally defined as the area between the Washington Park Arboretum to Portage Bay on the east and west, the Montlake Cut on the north, and Interlaken Park or Interlaken Boulevard on the south. The Montlake neighborhood appears to meet the eligibility criteria for listing in the NRHP as a historic district under Criterion C at the local level of significance. Taken as a whole, the area represents a significant, cohesive collection of residential architecture typical of early 20th century Seattle, with a combination of distinctive builder’s houses, high-style, architect-designed residences, and impressive non-residential structures. The styles in this potential historic district are cohesive, consisting of primarily Craftsman, Tudor Revival, and Colonial Revival residences. Many are individually distinctive, and there is a low level of intrusion. The period of significance is 1905 to 1952.

The main era of construction in what is now known as the Montlake neighborhood was from 1910 to the 1940s. The area of the neighborhood south of SR 520, originally known as “Interlaken,” was developed by John Boyer of the Interlaken Land Company in December 1905. bordered on the west by Interlaken Park and on the east by Washington Park, the plat featured twenty irregularly shaped blocks located on either side of 24th Avenue East to the north of East Galer Street. Boyer imposed restrictive covenants requiring that homes constructed east of 24th Avenue had to cost not less than $3,000, and those west of 24th not less than $5,000, ensuring above average construction. Three parks were eventually incorporated into the neighborhood development, in addition to the Arboretum and Interlaken, and in time the neighborhood had schools, churches, a library, a museum, and two small business areas. While Boyer had preferred the name “Interlaken” for the neighborhood he helped develop, he later agreed to “Montlake” as the name for the entire neighborhood, which is generally accepted today. In spite of the intrusion of SR 520 in the 1960s on the old Portage Canal site, and the failed R. H. Thomson Expressway (and associated demolitions), the Montlake neighborhood remains essentially intact.

**Description of Physical Appearance:**

The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Modern style. It has a flat roof with metal coping. The exterior walls are clad with vertically grooved wood siding. The primary facade is asymmetrically divided into three sections. The fenestration consists of original windows throughout the residence. A detached garage stands to the north of the residence. It is connected to the residence by an original breezeway.

**Engineer:**

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

**Statement of Significance:**

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1926 in the Eastlake neighborhood, and now stands a few parcels west of SR 520. The residence is a modest example of the Colonial Revival style and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The residence's setting has also been impacted by the construction of I-5 to the east, and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**

The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Colonial Revival style. It has a medium pitch cross-gable jerkinhead roof with composition shingles and slightly overhanging eaves. The exterior walls are clad with wood clapboard siding and stucco. The primary facade is asymmetrically divided and two bays wide. The fenestration primarily consists of original wood windows with some replacements.

Landscape Architect: Engineer: 

Property appears to meet criteria for the National Register of Historic Places: No 
Property is located in a potential historic district (National and/or local): No 
Property potentially contributes to a historic district (National and/or local): No 

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1958 in the Montlake neighborhood. The building has suffered a substantial loss of integrity of design and materials from changes to its plan, exterior wall cladding, and fenestration. It also was constructed after the period of significance for the potential historic district. Based on our evaluation, the property has lost integrity and therefore is ineligible for listing in the NRHP individually or as a contributing element to the Montlake NRHP-eligible historic district.

Description of Physical Appearance: The property contains a one-story commercial building with an L-shape plan. The building has a vernacular commercial design. It has a medium pitched front-gable roof with metal sheathing and a flat roof with parapet and metal coping. The exterior walls are clad with a stucco finish and wood clapboard siding. The primary facade is asymmetrically divided and seven bays wide. The window fenestration is composed of non-original metal windows.

Property appears to meet criteria for the National Register of Historic Places: Yes

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1951 in an area located adjacent (to the west) of the potential Montlake historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. The individual house, however, does embody the distinctive characteristics of the Modern style and could be the design of a master architect. Based on our evaluation, the property is outside the boundaries of the Montlake historic district, but does appear individually eligible for listing in the NRHP under Criterion C for its architectural design.

Description of Physical Appearance:
The property contains a one-story single-family residence with an irregular plan and platform frame wood construction. The residence was originally designed in the Modern style. It has a flat roof with overhanging eaves and metal coping. The exterior walls are clad in vertical wood siding. The primary façade is asymmetrically divided and multiple bays wide. The window fenestration is composed of original wood windows. The residence features an attached garage.

**Engineer:**

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

#### Statement of Significance:

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1926 in the Eastlake neighborhood, and now stands a few parcels west of SR 520. The residence is a modest example of the Colonial Revival style and has fair integrity, due to changes to its exterior wall cladding and fenestration. The residence's setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

#### Description of Physical Appearance:

The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Colonial Revival style. It has a medium pitch front-gable roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with wood clapboard siding and a non-original, applied rough textured stucco finish. The primary facade is asymmetrically divided and two bays wide. The fenestration is composed of original wood windows with some replacements.

Historic Property Inventory Report

Year Constructed: 1914

Architect: [Name]
Builder: [Name]
Landscape Architect: [Name]
Engineer: [Name]

Property appears to meet criteria for the National Register of Historic Places: Yes

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1914 in the Eastlake neighborhood. The residence has good integrity and embodies the distinctive characteristics of the Craftsman style as constructed in the Eastlake neighborhood in the early twentieth century. Its setting has been somewhat impacted by the construction of I-5 to the east, but it is one of a dwindling few historic residences that continue to remain intact in the neighborhood. Based on our evaluation, the property appears individually eligible for listing in the NRHP under Criterion C for its architectural design.

The Eastlake neighborhood was first developed in the 1880s. It contains an interesting mixture of apartment buildings, single family residences, houseboats, and commercial structures. Its current boundaries – east of Lake Union, south of University Bridge, west of I-5, and north of Mercer Street - were defined by the construction of I-5, which cut off Eastlake from adjacent Roanoke Park and the rest of Capitol Hill. Much of the history of the Eastlake neighborhood centers on Lake Union and maritime development and industry. In 1916, Boeing's first factory was located on the shores of Lake Union at the foot of Roanoke Street. However, since 1960s and 1970s, with the construction of I-5, the neighborhood has suffered numerous demolitions, less than sensitive infill construction, and substantial renovations of its older building stock. Many intact historic buildings still remain from the early twentieth century through the 1920s, but these are intermixed with examples of newer construction and extensive remodels mixed. While the Eastlake neighborhood has strong physical boundaries and is a cohesive community, the area of the neighborhood adjacent to I-5 appears unlikely to be eligible as an NRHP or local historic district due to the high number of intrusions and loss of integrity.

Description of Physical Appearance:

The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a medium pitch cross-gable roof with composition asphalt shingles, decorative wood elements, and wide overhanging eaves. The exterior walls are clad with wood clapboard siding and a brick veneer. The primary facade is symmetrically divided and three bays wide. The fenestration is composed of original wood windows.

Landscape Architect: 
Engineer: 

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1953 in an area located adjacent (to the west) of the potential Montlake historic district. The residence has been substantially altered and has poor integrity. It is also outside the suggested historic district boundaries and its age is beyond the period of significance for that district (1905 to 1952), which would qualify it as an intrusion if it were included within the boundaries. The area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance:
The property contains a three-story single-family residence with an irregular plan and platform frame wood construction. The residence was originally designed in the Modern style, but has been substantially altered. It has a flat roof with a thick metal coping. The exterior walls are clad with board and batten siding and wood shingles. The primary facade is asymmetrically divided and four bays wide. The window fenestration is composed of non-original windows.

Historic Property Inventory Report

Year Constructed: 1924

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1924 in the Montlake neighborhood. The residence has suffered from several alterations that have affected its integrity of design and materials, including removal and replacement of the original exterior wall cladding and changes to the front porch. Because of these alterations, it no longer has the ability to convey significance as a representative example of the early twentieth century houses that make up the historic district. Based on our evaluation, the property has lost integrity and therefore is ineligible for listing in the NRHP individually or as a contributing element to the Montlake NRHP-eligible historic district.

Description of Physical Appearance:
The property contains a one-story single-family residence with an L-shape plan and platform frame wood construction. The residence was originally designed with the elements of the Craftsman style. It has a medium pitched side-gable roof with composition asphalt shingles. The exterior walls are clad with coursed wood shingle siding. The primary facade is asymmetrically divided and four bays wide. The fenestration consists of original wood windows throughout the residence.

Architect: Builder: 
Landscape Architect: 

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1914 in the Eastlake neighborhood, and now stands a few parcels west of SR 520. The residence is a modest example of the Craftsman style and has fair integrity, due to changes to its fenestration. The residence's setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a two-story single-family residence that has been converted for use as a duplex. It has a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a medium pitch front-gable roof with composition shingles, decorative wood brackets, and overhanging eaves. The exterior walls are clad with wood clapboard siding and a stucco finish with half-timbering. The primary facade is asymmetrically divided and three bays wide. The fenestration consists of non-original vinyl replacement windows throughout the residence.

### Statement of Significance:

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR 520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1965 in the Eastlake neighborhood, and now stands a few parcels west of SR 520. The building is a modest example of the Modern style and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The building's setting has also been impacted by the construction of I-5 to the east, and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

### Description of Physical Appearance:

The property contains a three-story apartment building with a rectangular plan and platform frame wood construction. The residence was originally designed in the Modern style. It has a flat roof with metal coping and overhanging eaves. The exterior walls are clad with a rough textured stucco finish. The primary facade is asymmetrically divided and three bays wide. The fenestration is composed of original metal windows. A recessed ground floor provides covered parking.

Property appears to meet criteria for the National Register of Historic Places: Yes  
Property is located in a potential historic district (National and/or local): Yes - National  
Property potentially contributes to a historic district (National and/or local): Yes - National

**Statement of Significance:**  
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1924 in the Montlake neighborhood. The residence has good integrity and is a representative example of the early twentieth century houses that make up the historic district. The house embodies the distinctive characteristics of the Craftsman style and is a modest example of the style. Based on our evaluation, the property appears eligible for listing in the NRHP as a contributing element to the Montlake NRHP-eligible historic district.

**Description of Physical Appearance:**  
The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Craftsman style. It has a medium pitch front-gable roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad in wood clapboard siding. The primary facade is symmetrically divided and three bays wide. The window fenestration is composed of original wood windows.

Architect:  

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1912 in an area located adjacent (to the west) of the potential Montlake historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance:
The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Spanish Colonial Revival style. It has a medium pitched hip roof with clay tiles, exposed rafter tails, and overhanging eaves. The exterior walls are clad in a slightly textured stucco finish. The primary facade is asymmetrically divided and four bays wide. The window fenestration is composed of original wood windows. A detached garage stands on the property.

**Property appears to meet criteria for the National Register of Historic Places:** No  
**Property is located in a potential historic district (National and/or local):** No  
**Property potentially contributes to a historic district (National and/or local):** No  

**Statement of Significance:**  
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1928 in an area located adjacent (to the west) of the potential Montlake historic district. The residence has fair integrity, but is outside the suggested historic district boundaries. The area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

**Description of Physical Appearance:**  
The property contains a two and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Tudor Revival style. It has a steeply pitched cross gable roof with composition shingles and a shed roof dormer. The exterior walls are clad with wood clapboard siding. The primary facade is asymmetrically divided and three bays wide. The window fenestration is composed of original windows. A non-original deck has been added to the front elevation. A detached one-car one-story garage of wood construction stands in front of the residence.

Property appears to meet criteria for the National Register of Historic Places: **No**

Property is located in a potential historic district (National and/or local): **No**

Property potentially contributes to a historic district (National and/or local): **No**

### Statement of Significance:

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1927 in an area located adjacent (to the west) of the potential Montlake historic district. The residence has fair integrity, due to replacement of its windows, and it is outside the suggested historic district boundaries. The area where this house is located also contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

### Description of Physical Appearance:

The property contains a one-story single-family residence with an irregular rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Colonial Revival style. It has a medium pitch cross-gable roof with composition asphalt shingles, supportive wood brackets, and overhanging eaves. The exterior walls are clad with wood clapboard siding. The primary facade is asymmetrically divided and four bays wide. The window fenestration is composed of non-original vinyl windows.

### Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1926 in the Montlake neighborhood. The residence has good integrity and is a representative example of the early twentieth century houses that make up the historic district. The house embodies the distinctive characteristics of the Swiss Chalet Arts & Crafts style and is an good example of the style. Based on our evaluation, the property appears eligible for listing in the NRHP as a contributing element to the Montlake NRHP-eligible historic district.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1926 in an area located adjacent (to the west) of the potential Montlake historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. The individual house, however, does embody the distinctive characteristics of the Swiss Chalet Arts & Crafts style and is a good example of the style. Based on our evaluation, the property is outside the boundaries of the Montlake historic district, but does appear individually eligible for listing in the NRHP under Criterion C for its architectural design.

### Description of Physical Appearance:
The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Swiss Chalet variation of the Arts & Crafts style. It has a steeply pitched front gable roof with composition roofing, exposed structural elements, overhanging eaves, and decorative fascia boards. The exterior walls are clad with stucco and wood clapboard siding. The primary facade is asymmetrically divided and three bays wide. The fenestration consists of original wood windows with leaded glass panes throughout the residence. An attached garage is arranged below the primary facade.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1926 in the Montlake neighborhood. Alterations have been made to some of the windows and portions of the exterior wall cladding, which has affect the residence’s integrity of design and materials. However, despite these alterations, it continues to convey significance as a representative example of the early twentieth century houses that make up the historic district. The house embodies the distinctive characteristics of the Tudor Revival style and is an modest example of the style. Based on our evaluation, the property appears eligible for listing in the NRHP as a contributing element to the Montlake NRHP-eligible historic district.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1926 in an area located adjacent (to the west) of the potential Montlake historic district. The residence has fair integrity, due to alterations to its windows and wall cladding, including the enclosure of a basement level garage, but is outside the suggested historic district boundaries. The area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

The property contains a one and a half-story single-family residence with a rectangular plan and platform frame construction. The residence was originally designed with elements of the Tudor Revival style. It has a steeply pitched cross-gable roof with composition asphalt shingles and a gabled dormer. The exterior walls are clad with half timbered stucco and wood shingles. The primary facade is asymmetrically divided and three bays wide. The fenestration consists of both original and non-original windows throughout the residence. An attached garage is arranged below the primary façade.

**Architect:**

**Property appears to meet criteria for the National Register of Historic Places:** Yes

**Property is located in a potential historic district (National and/or local):** Yes - National

**Property potentially contributes to a historic district (National and/or local):** Yes - National

**Statement of Significance:** The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1925 in the Montlake neighborhood. Some of the windows have been replaced and the basement level garage enclosed, which has caused the residence to suffer loss of integrity of design and materials. However, despite these alterations, it continues to convey significance as a representative example of the early twentieth century houses that make up the historic district. The house embodies the distinctive characteristics of Tudor Revival style architecture and is an modest example of the style. Based on our evaluation, the property appears eligible for listing in the NRHP as a contributing element to the Montlake NRHP-eligible historic district.

**Description of Physical Appearance:** The property contains a one and a half-story single-family residence with a rectangular plan and platform frame construction. The residence was originally designed with elements of the Tudor Revival style. It has a steeply pitched cross-gable roof with composition asphalt shingles and overhanging eaves. The exterior walls are clad with wood clapboard siding. The primary facade is asymmetrically divided and three bays wide. The fenestration primarily consists of original throughout the residence. However, some have been replaced. The basement level contains former garage that has been converted to living space and enclosed with T-1-11 siding. A non-original wood deck addition is arranged along the east elevation.

Landscape Architect: 
Engineer: 

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1910 in an area located adjacent (to the west) of the potential Montlake historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance:
The property contains a three-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Craftsman style. It has a medium pitch side-gable roof with composition asphalt shingles, supportive wood brackets, a gable roof dormer, and wide overhanging eaves. The exterior walls are clad with wood shingles and a rough textured stucco finish with half timbering. The primary facade is asymmetrically divided and multiple bays wide. The fenestration is composed of original wood windows.

Architect: 
Builder: 
Landscape Engineer: 
Architect: 

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1908 in an area located adjacent (to the west) of the potential Montlake historic district. The residence has fair integrity, but is outside the suggested historic district boundaries. The area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance:
The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in Craftsman style. It has a medium pitch front gable roof with composition asphalt shingle roofing, exposed structural elements, overhanging eaves, and a shed roof dormer. The porch is sheltered by its own gable roof. The exterior walls are clad with coursed wood shingles. The primary facade is asymmetrically divided and two bays wide. The fenestration is composed of a combination of both original wood windows and non-original vinyl replacement windows.

**Date of Construction:** 1919 Built Date

**Builder:**

**Engineer:**

**Architect:**

**Property appears to meet criteria for the National Register of Historic Places:** Yes

**Property is located in a potential historic district (National and/or local):** No

**Property potentially contributes to a historic district (National and/or local):** No

**Statement of Significance:**
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1919, and is known to have been the permanent residence of Hellmut Wilhelm (1905–1990) from 1948 until his death in 1990. Wilhelm was an internationally acclaimed scholar of Chinese history, literature, and thought. He joined the University of Washington in 1948 where he served on the faculty of the Department of Far Eastern Slavic Languages and Literature, and was a member of the Far Eastern and Russian Institute, until retiring in 1971. He is best known for his work to study and interpret the I Ching, or Chinese Book of Changes, carrying on the work of his father, renowned sinologist Richard Wilhelm, who first translated the text. The I Ching is an early Chinese oracle text that became the most important book of wisdom and philosophy in the Chinese tradition. The residence has good integrity and remains substantially intact from the period in which Wilhelm occupied the residence. Based on our evaluation, the property appears individually eligible for listing in the NRHP under Criterion B for its association with Hellmut Wilhelm. The house was Wilhelm’s place of residence throughout his productive life as a professor at the University of Washington, becoming an internationally acclaimed scholar in the field of Chinese studies.
Historic Inventory Report

| Description of Physical Appearance: | The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Dutch Colonial Revival style. It has a medium pitch side-gable gambrel roof with composition asphalt shingle roofing and slightly overhanging eaves. The exterior walls are clad with wood clapboard siding. The primary facade is symmetrically divided and three bays wide. The fenestration is composed of original wood windows. |

Architecture/Landscape Architecture

Tuesday, August 24, 2010
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1924 in the Montlake neighborhood. The residence has good integrity and is a representative example of the early twentieth century houses that make up the historic district. The house embodies the distinctive characteristics of Tudor Revival style architecture and is a good example of the style. Based on our evaluation, the property appears eligible for listing in the NRHP as a contributing element to the Montlake NRHP-eligible historic district.

The Montlake neighborhood area is generally defined as the area between the Washington Park Arboretum to Portage Bay on the east and west, the Montlake Cut on the north, and Interlaken Park or Interlaken Boulevard on the south. The Montlake neighborhood appears to meet the eligibility criteria for listing in the NRHP as a historic district under Criterion C at the local level of significance. Taken as a whole, the area represents a significant, cohesive collection of residential architecture typical of early 20th century Seattle, with a combination of distinctive builder’s houses, high-style, architect-designed residences, and impressive non-residential structures. The styles in this potential historic district are cohesive, consisting of primarily Craftsman, Tudor Revival, and Colonial Revival residences. Many are individually distinctive, and there is a low level of intrusion. The period of significance is 1905 to 1952.

The main era of construction in what is now known as the Montlake neighborhood was from 1910 to the 1940s. The area of the neighborhood south of SR 520, originally known as "Interlaken," was developed by John Boyer of the Interlaken Land Company in December 1905. bordered on the west by Interlaken Park and on the east by Washington Park, the plat featured twenty irregularly shaped blocks located on either side of 24th Avenue East to the north of East Galer Street. Boyer imposed restrictive covenants requiring that homes constructed east of 24th Avenue had to cost not less than $3,000, and those west of 24th not less than $5,000, ensuring above average construction. Three parks were eventually incorporated into the neighborhood development, in addition to the Arboretum and Interlaken, and in time the neighborhood had schools, churches, a library, a museum, and two small business areas. While Boyer had preferred the name "Interlaken" for the neighborhood he helped develop, he later agreed to "Montlake" as the name for the entire neighborhood, which is generally accepted today. In spite of the intrusion of SR 520 in the 1960s on the old Portage Canal site, and the failed R. H. Thomson Expressway (and associated demolitions), the Montlake neighborhood remains essentially intact.

The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Tudor Revival style. It has a steeply pitched side clipped and cross-gabled roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with a rough textured stucco. The primary facade is asymmetrically divided and four bays wide. The fenestration consists of original wood windows with leaded panes throughout the residence.

1938

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the
SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County,
Washington. It was constructed in 1938 in an area located adjacent (to the west) of the potential
Montlake historic district. The residence has fair integrity, due to removal and replacement of its original
windows and changes to its front deck and garage, and is a modest representation of the Colonial Revival
style located outside the suggested historic district boundaries. The area where this house is located
contains much new construction, and few of those extant houses that date from before 1971 are
architecturally distinguished. This house and its immediately neighboring structures do not convey the
historic significance of the community. Based on our evaluation, the property appears ineligible for listing
in the NRHP individually or as a contributor to a potential historic district.

The property contains a one-story single-family residence with a rectangular plan and platform frame
wood construction. The residence was originally designed in the Colonial Revival style. It has a medium
pitch side gable roof with slightly overhanging eaves. The exterior walls are clad with vinyl siding. The
primary façade is asymmetrically divided and three bays wide. The fenestration consists of non-original
replacement windows throughout the residence. A full width attached garage with a deck atop it is
arranged below and in front of the primary façade.

2000.

Engineer:  

Property appears to meet criteria for the National Register of Historic Places: No  
Property is located in a potential historic district (National and/or local): No  
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:  
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was originally constructed in 1909 in an area located adjacent (to the west) of the potential Montlake historic district. However, the residence has since been substantially altered and little of the original residence remains intact. The area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house has lost integrity and no longer conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance:  
The property contains a three-story single-family residence with a rectangular plan and platform frame wood construction. The original 1909 residence was substantially altered and the existing residence constructed in the Modern style. It has a flat roof with metal coping. The exterior walls are clad concrete and wood. The primary façade is asymmetrically divided and two bays wide. The fenestration consists of original metal windows throughout the residence. A detached garage stands to the northeast of the residence.

Landscape Architect: 
Engineer:

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1949 in an area located adjacent (to the west) of the potential Montlake historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. Therefore, there is no potential for a historic district here. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance:
The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Modern style. It has a low pitch side gable roof with overhanging eaves. The exterior walls are clad with T-1-11 siding. The primary façade is asymmetrically divided and three bays wide. The fenestration consists of original metal windows throughout the residence. A non-original deck spans the entire width of the façade. A detached garage with two bays stands to the northeast of the residence.

Year Constructed | Work Type Description
--- | ---
1953 | Built Date

Architect: | Builder:
--- | ---
Landscape Architect: | Engineer:

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1953 in an area located adjacent (to the west) of the potential Montlake historic district. The residence has fair integrity, due to changes to the wall cladding and fenestration. It is outside the suggested historic district boundaries and its age is beyond the period of significance for that district (1905 to 1952), which would qualify it as an intrusion if it were included within the boundaries. The area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. Therefore, there is no potential for a historic district here. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance:
The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Ranch and Minimal Traditional styles. It has a medium pitched hipped roof with wide overhanging eaves and composition shingles. The exterior walls are clad with T-1-11 siding, wood clapboard siding, and a flagstone veneer water table. The primary façade is asymmetrically divided and three bays wide. The fenestration consists of non-original aluminum sliding windows throughout the residence. A non-original carport addition is arranged in front of the primary facade.

Historic Property Inventory Report

Year Constructed | Work Type Description
---|---
1930 | Built Date

Architect: | Builder: 
Landscape Architect: | Engineer: 

Property appears to meet criteria for the National Register of Historic Places: Yes
Property is located in a potential historic district (National and/or local): Yes - National
Property potentially contributes to a historic district (National and/or local): Yes - National

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1930 in the Montlake neighborhood. The residence has good integrity and is a representative example of the early twentieth century houses that make up the historic district. The house embodies the distinctive characteristics of Tudor Revival style architecture and is an good example of the style. Based on our evaluation, the property appears eligible for listing in the NRHP as a contributing element to the Montlake NRHP-eligible historic district.

The Montlake neighborhood area is generally defined as the area between the Washington Park Arboretum to Portage Bay on the east and west, the Montlake Cut on the north, and Interlaken Park or Interlaken Boulevard on the south. The Montlake neighborhood appears to meet the eligibility criteria for listing in the NRHP as a historic district under Criterion C at the local level of significance. Taken as a whole, the area represents a significant, cohesive collection of residential architecture typical of early 20th century Seattle, with a combination of distinctive builder’s houses, high-style, architect-designed residences, and impressive non-residential structures. The styles in this potential historic district are cohesive, consisting of primarily Craftsman, Tudor Revival, and Colonial Revival residences. Many are individually distinctive, and there is a low level of intrusion. The period of significance is 1905 to 1952.

The main era of construction in what is now known as the Montlake neighborhood was from 1910 to the 1940s. The area of the neighborhood south of SR 520, originally known as “Interlaken,” was developed by John Boyer of the Interlaken Land Company in December 1905. Bordered on the west by Interlaken Park and on the east by Washington Park, the plat featured twenty irregularly shaped blocks located on either side of 24th Avenue East to the north of East Galer Street. Boyer imposed restrictive covenants requiring that homes constructed east of 24th Avenue had to cost not less than $3,000, and those west of 24th not less than $5,000, ensuring above average construction. Three parks were eventually incorporated into the neighborhood development, in addition to the Arboretum and Interlaken, and in time the neighborhood had schools, churches, a library, a museum, and two small business areas. While Boyer had preferred the name “Interlaken” for the neighborhood he helped develop, he later agreed to “Montlake” as the name for the entire neighborhood, which is generally accepted today. In spite of the intrusion of SR 520 in the 1960s on the old Portage Canal site, and the failed R. H. Thomson Expressway (and associated demolitions), the Montlake neighborhood remains essentially intact.

Description of Physical Appearance: The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Tudor Revival style. It has a steeply pitched cross-gable roof with composition asphalt shingles. The exterior walls are clad with a brick veneer and wood siding. The primary facade is asymmetrically divided and three bays wide. The fenestration consists of original wood windows throughout the residence. A basement garage stands below the residence.

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1954 in an area located adjacent (to the west) of the potential Montlake historic district. The residence has fair integrity, due to changes to the wall cladding and windows. It is also outside the suggested historic district boundaries and its age is beyond the period of significance for that district (1905 to 1952), which would qualify it as an intrusion if it were included within the boundaries. The area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. Therefore, there is no potential for a historic district here. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance: The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction that stands on a sloping grade. It has a medium pitch side-gable roof with overhanging eaves and composition asphalt shingles. The exterior walls are clad with wood clapboard siding. The primary façade is asymmetrically divided and two bays wide. An attached garage faces the street with two garage bays.

The area of the neighborhood south of SR 520, originally known as “Interlaken,” was developed by John Boyer of the Interlaken Land Company in December 1905. BORDERED ON THE WEST BY INTERLAKEN PARK AND ON THE EAST BY WASHINGTON PARK, THE PLAT FEATURED TWENTY IRREGULARLY SHAPED BLOCKS LOCATED ON EITHER SIDE OF 24TH AVENUE EAST TO THE NORTH OF EAST GALER STREET. BOYER IMPOSED RESTRICTIVE COVENANTS REQUIRING THAT HOMES CONSTRUCTED EAST OF 24TH AVENUE HAD TO COST NOT LESS THAN $3,000, AND THOSE WEST OF 24TH NOT LESS THAN $5,000, ENSURING ABOVE AVERAGE CONSTRUCTION. THREE PARKS WERE EVENTUALLY INCORPORATED INTO THE NEIGHBORHOOD DEVELOPMENT, IN ADDITION TO THE ARBORETUM AND INTERLAKEN, AND IN TIME THE NEIGHBORHOOD HAD SCHOOLS, CHURCHES, A LIBRARY, A MUSEUM, AND TWO SMALL BUSINESS AREAS. WHILE BOYER HAD PREFERRED THE NAME “INTERLAKEN” FOR THE NEIGHBORHOOD HE HELPED DEVELOP, HE LATER AGREED TO “MONTLAKE” AS THE NAME FOR THE ENTIRE NEIGHBORHOOD, WHICH IS GENERALLY ACCEPTED TODAY. IN SPITE OF THE INTRUSION OF SR 520 IN THE 1960S ON THE OLD PORTAGE CANAL SITE, AND THE FAILED R. H. THOMSON EXPRESSWAY (AND ASSOCIATED DEMOLITIONS), THE MONTLAKE NEIGHBORHOOD REMAINS ESSENTIALLY INTACT.

Description of Physical Appearance:

The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Colonial Revival style. It has a medium pitch hip roof with composition asphalt shingles and overhanging eaves. The exterior walls are clad with red brick. The primary facade is symmetrically divided and three bays wide with a wing at the west elevation. The fenestration consists of original wood windows throughout the residence, except for two altered picture windows at the primary facade.

Year Constructed: 1958

Work Type Description: Built Date

Architect: Builder: Landscape Architect: Engineer:

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1958 in an area located adjacent (to the west) of the potential Montlake historic district. The residence has fair integrity, with alterations to the fenestration and wall cladding. It is outside the suggested historic district boundaries and its age is beyond the period of significance for that district (1905 to 1952), which would qualify it as an intrusion if it were included within the boundaries. The area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance:
The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Modern style. It has a flat roof with overhanging eaves and metal coping. The exterior walls are clad with board and batten siding. The primary facade is asymmetrically divided and four bays wide. The window fenestration is composed of original metal windows.

### Landscape Engineer: 

### Property appears to meet criteria for the National Register of Historic Places: 

**No**

### Property is located in a potential historic district (National and/or local): 

**No**

### Property potentially contributes to a historic district (National and/or local): 

**No**

### Statement of Significance:

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1909 in an area located adjacent (to the west) of the potential Montlake historic district, and has poor integrity because of substantially alterations to its windows, wall cladding, and front porch. It is outside the suggested historic district boundaries, and the area where this house is located contains much new construction, and few of those extant houses that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not convey the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

### Description of Physical Appearance:

The property contains a three-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Colonial Revival style, but has been substantially altered. It has a medium pitched side-gable roof with a large shed roof dormer, composition shingles and overhanging eaves. The exterior walls are clad with coursed wood shingles. The primary facade is symmetrically divided and three bays wide. The window fenestration is composed of non-original windows.

Narrative

Study Unit Other
Architecture/Landscape Architecture
The Montlake area is generally from the Washington Park Arboretum to Portage Bay, with the northern boundary at the Montlake Cut and the southern boundary often listed as Interlaken Park or Interlaken Boulevard. The name “Montlake” frequently appears on maps such as the Thomas Guide as the label for this entire neighborhood.

The Montlake neighborhood appears to meet the eligibility criteria for a NRHP historic district under Criterion C. Taken as a whole, the area represents a significant, cohesive collection of residential architecture typical of early 20th century Seattle, with a combination of distinctive builder’s houses, high-style, architect-designed residences, and impressive non-residential structures. There is a very low level of intrusion. The period of significance is 1905 to 1952.

The area of the neighborhood south of SR 520, originally known as “Interlaken,” was developed separately from, though basically concurrently with, the northern part of the neighborhood. John Boyer of the Interlaken Land Company filed his plat in December 1905. Bordered on the west by Interlaken Park and on the east by Washington Park, the plat featured twenty irregularly shaped blocks located on either side of 24th Avenue East to the north of East Galer Street. Boyer imposed restrictive covenants requiring that homes constructed east of 24th Avenue had to cost not less than $3,000, and those west of 24th not less than $5,000, ensuring above average construction.

The area now north of SR 520 was originally known as Union City, so named by Harvey Pike in 1861. It was incorporated into the City of Seattle in 1891. With the Alaska-Yukon Pacific Exposition in 1909 at the University of Washington campus, the area received extensive exposure and benefited from increased public transit to the area. Two brothers, Calvin and William Hagan, with partner James Corner (Sherwood, August 1974) originated the name “Montlake” as they developed “Montlake Park, An Addition to the City of Seattle” in July of 1909. This development occupied the area between the present day Montlake Cut and SR 520, and encompassed the eight blocks originally platted as H.L. Pike's First Addition to Union City in 1870.

The main era of construction in what is now known as Montlake was from 1910 to the 1940s, and the side streets appear to have been paved in 1926 (Gould 2000). Three parks were incorporated into the neighborhood development, in addition to the Arboretum and Interlaken, and in time the neighborhood had schools, churches, a library, a museum, and two small business areas. While Boyer had preferred the name “Interlaken” for the neighborhood he helped develop, he later agreed to “Montlake” as the name for the entire neighborhood (Gould 2000), which is generally accepted today. In spite of the intrusion of SR 520 in the 1960s on the old Portage Canal site, and the failed R. H. Thomson Expressway (and associated demolitions), the Montlake neighborhood remains essentially intact.

The styles in this potential historic district are cohesive, mainly Craftsman, Tudor Revival, and Colonial Revival, but the houses are “individually distinctive” (Gould 2000). Several high-style, distinctive houses along Lake Washington Boulevard include turreted Tudor Revivals and stuccoed California Mediterraneans. Noteworthy non-residential structures in the area include the Montlake Bridge (1925 - NRHP, WHR and City of Seattle Landmark), MOHAI, NOAA NW Fisheries Science Center, the Seattle Yacht Club (1920 – NRHP, WHR and City of Seattle Landmark), and the gateways, gardens, pavilions, Arboretum Aqueduct (1910 - NRHP, WHR and City of Seattle Landmark) and other components of the Washington Park Arboretum that borders the neighborhood.
This residence from 1937 is eligible for the NRHP as a contributing element to the Montlake potential historic district. It is a representative example of the early twentieth century houses that make up the district and retains very good integrity. However, available research did not reveal any associations with significant persons or events, and the house does not represent the work of a master, nor possess high artistic value. Therefore, it is not individually eligible for the NRHP, but is eligible as a contributing element to the potential historic district.

**Description of Physical Appearance:**

This is a two story, single family house in a late Art Deco style. It has a rectangular footprint and a hipped roof of composition shingle with a wide interior brick chimney placed off-center and running perpendicular to the ridgeline. The exterior of the house is clad in wide wood clapboards that wrap around the corners with no cornerboards, resulting in a clean, streamlined appearance. The house has a symmetrical façade with a center entry. The entry is composed of a pair of wood doors ornamented with diagonal trim forming a chevron pattern. The doors are contained within a wide surround with a narrow inset panel above the doors and reeded panels on each side of the doors with a patera above each. A non-original shed awning supported on metal braces and covered in corrugated metal shields the front entry. An elongated octagonal window is found on the second floor above the entry. On the first floor, the entry is flanked by a pair of tripartite windows. These windows are full length and have a center section of five horizontal panes between side sections of five smaller, square panes. On the second floor above these tripartite windows are two 4/4 windows with a diagonal cross pattern metal railing across the lower sash. At the top of the wall, just below the roofline, is a band of wave molding that wraps all the way around the house. Windows on the side elevations are 4/6 on the first floor and 4/4 on the second floor. There is a below-grade garage on the south elevation, accessed from E. Louisa Street.

Historic Property Inventory Report

Year Constructed  Work Type Description
1937  Built Date

Architect:  Builder:

Landscape Architect:  Engineer:

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1937 in the Montlake neighborhood. The residence was originally constructed in the Colonial Revival style, but appears to have been substantially remodeled at a later date to give it a more Modern style appearance. Because of these alterations, it no longer has the ability to convey significance as a representative example of the early twentieth century houses that make up the historic district. Based on our evaluation, the property has lost integrity and therefore is ineligible for listing in the NRHP individually or as a contributing element to the Montlake NRHP-eligible historic district.

Description of Physical Appearance: The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Colonial Revival style, but appears to have later been remodeled with Modern style elements. It has a medium pitched hip roof. The exterior walls are clad with wood siding. The primary facade is symmetrically divided and three bays wide. The window fenestration is composed of non-original metal windows.

The Montlake area is generally from the Washington Park Arboretum to Portage Bay, with the northern boundary at the Montlake Cut and the southern boundary often listed as Interlaken Park or Interlaken Boulevard. The name "Montlake" frequently appears on maps such as the Thomas Guide as the label for this entire neighborhood. The Montlake neighborhood appears to meet the eligibility criteria for a NRHP historic district under Criterion C. Taken as a whole, the area represents a significant, cohesive collection of residential architecture typical of early 20th century Seattle, with a combination of distinctive builder’s houses, high-style, architect-designed residences, and impressive non-residential structures. There is a very low level of intrusion. The period of significance is 1905 to 1952.

The area of the neighborhood south of SR 520, originally known as “Interlaken,” was developed separately from, though basically concurrently with, the northern part of the neighborhood. John Boyer of the Interlaken Land Company filed his plat in December 1905. Bordering on the west by Interlaken Park and on the east by Washington Park, the plat featured twenty irregularly shaped blocks located on either side of 24th Avenue East to the north of East Galer Street. Boyer imposed restrictive covenants requiring that homes constructed east of 24th Avenue had to cost not less than $3,000, and those west of 24th not less than $5,000, ensuring above average construction.

The area now north of SR 520 was originally known as Union City, so named by Harvey Pike in 1861. It was incorporated into the City of Seattle in 1891. With the Alaska-Yukon Pacific Exposition in 1909 at the University of Washington campus, the area received extensive exposure and benefited from increased public transit to the area. Two brothers, Calvin and William Hagan, with partner James Corner (Sherwood, August 1974) originated the name "Montlake" as they developed “Montlake Park, An Addition to the City of Seattle” in July of 1909. This development occupied the area between the present day Montlake Cut and SR 520, and encompassed the eight blocks originally platted as H.L. Pike’s First Addition to Union City in 1870.

The main era of construction in what is now known as Montlake was from 1910 to the 1940s, and the side streets appear to have been paved in 1926 (Gould 2000). Three parks were incorporated into the neighborhood development, in addition to the Arboretum and Interlaken, and in time the neighborhood had schools, churches, a library, a museum, and two small business areas. While Boyer had preferred the name “Interlaken” for the neighborhood he helped develop, he later agreed to “Montlake” as the name for the entire neighborhood (Gould 2000), which is generally accepted today. In spite of the intrusion of SR 520 in the 1960s on the old Portage Canal site, and the failed R. H. Thomson Expressway (and associated demolitions), the Montlake neighborhood remains essentially intact.

The styles in this potential historic district are cohesive, mainly Craftsman, Tudor Revival, and Colonial Revival, but the houses are “individually distinctive” (Gould 2000). Several high-style, distinctive houses along Lake Washington Boulevard include turreted Tudor Revivals and stuccoed California Mediterraneans. Noteworthy non-residential structures in the area include the Montlake Bridge (1925 - NRHP, WHR and City of Seattle Landmark), MOHAI, NOAA NW Fisheries Science Center, the Seattle Yacht Club (1920 – NRHP, WHR and City of Seattle Landmark), and the gateways, gardens, pavilions, Arboretum Aqueduct (1910 - NRHP, WHR and City of Seattle Landmark) and other components of the Washington Park Arboretum that borders the neighborhood.
This house was constructed in 1962, which is outside the period of significance for the potential Montlake historic district, so it is not eligible for the NRHP as a contributing element to the district. It has been substantially renovated, including new windows, siding, entry awning, and decks. This has impacted its integrity of design, materials, feeling, and workmanship. While the present appearance of the house is well designed, it is not the known work of a master, and does not possess high artistic value. Available research did not reveal any associations with significant persons or events. Due to the lack of integrity and the failure to meet NRHP criteria, the house is not individually eligible for the NRHP.

This is a two story, single family residence with a rectangular footprint. It was built in 1962. It has a flat roof with projecting eaves, and the roof steps down over the northern quarter of the house. The exterior is clad in smooth stucco on the second floor, with a band of molding separating the stucco from the vertical wood siding on the first floor. Strips of this same molding separate the front façade into four vertical sections. The two sections on the southern end of the building are identical. Each has a pair of 1/1 metal-framed sliding sash windows symmetrically aligned on the first and second floors. These windows are set in a band of metal panels that reach from the bottom of the wall to the top, terminating at the eave, giving the house a strong vertical emphasis. The next section of the façade contains the entry, which is a pair of unadorned doors. A row of metal panels runs from the top of the doors to the top of the wall, encompassing a large 8-light fixed sash window on the second floor above the doors. The entry is shielded by a contemporary-style metal awning frame with glass panels. The final section of the front façade is the section on the north end, which is lower in height than the rest of the building. This section has two small narrow windows set in a very narrow strip of metal panels. The north elevation has a 3-light window on the second floor, set in a row of metal panels that is three panels wide in the center of the wall, again running from the top to the bottom of the wall. The south elevation has the same three-wide metal panels in the center of the wall, with three 1/1 windows on the second floor, and three modern glass doors on the first floor that open onto a fenced deck. A wooden fence also surrounds the front elevation, and behind this fence, the entry is accessed by a front deck with horizontal wood railing.

*Architecture/Landscape Architecture*
Historic Property Inventory Report

Year Constructed: 1962

Work Type Description: Built Date

Architect: Builder: 

Landscape Architect: Engineer: 

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1962 in the Montlake neighborhood. The building has good integrity and is a good example of the Modern style. However, it was constructed after the period of significance for the potential Montlake historic district (1905 to 1952). The building also does not appear to embody distinctive characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance:
The property contains a two-story single-family residence with a rectangular plan and platform frame construction. The residence was originally designed in the Modern style. It has a flat roof with overhanging eaves. The exterior walls are clad with a smooth stucco finish and T 1-11 siding. The primary facade is asymmetrically divided and four bays wide. The window fenestration is composed of original metal windows.

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1924 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has fair integrity, due to changes to the fenestration and porch, and is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance: The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a medium pitch front-gable roof with composition asphalt shingles and overhanging eaves. The exterior walls are clad with wood clapboard siding. The primary facade is asymmetrically divided. It is dominated by a screened porch with a deck arranged around it. The fenestration consists of non-original wood windows throughout the residence.

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1941 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence appears to have good integrity, but is outside the suggested historic district boundaries and its age is beyond the period of significance for that district (1900 to 1940), which would qualify it as an intrusion if it were included within the boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance:
The property contains a one-story single-family residence with a rectangular plan and platform frame construction on a sloping grade. The residence was originally designed in a vernacular variation of the Modern style. It has a low pitch hip roof with composition asphalt shingles and overhanging eaves. The exterior walls are clad with wood siding and the chimney is brick. The primary facade is asymmetrically divided and three bays wide. A detached garage with a rough textured stucco finish and a non-original door stands in front of and below the residence.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1924 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. The individual property, however, does embody the distinctive characteristics of the Craftsman style. Based on our evaluation, the property is outside the boundaries of the Roanoke historic district, but does appear individually eligible for listing in the NRHP under Criterion C for its architectural design.

The property contains a two-story single-family residence with a rectangular plan and platform frame construction. The residence was originally designed in the Craftsman style. It has a medium pitch front-gable roof with composition asphalt shingles, wide overhanging eaves, and wood eave brackets. The exterior walls are clad in wood clapboard siding with wood shingles on the second floor. The primary facade is symmetrically divided and three bays wide. The fenestration consists of original wood windows and doors throughout the residence. A garage is arranged below the residence.

Historic Property Inventory Report

Year Constructed: 1922  
Work Type Description: Built Date

Architect:  
Builder:  
Landscape Architect:  
Engineer:  

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1922 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished. This house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance:
The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a medium pitch side-gable roof with composition asphalt shingles, gable roof dormers, and overhanging eaves. The exterior walls are clad with wood clapboard siding. The primary facade is symmetrically divided and three bays wide. The fenestration consists of original and non-original wood windows throughout the residence.

Historic Property Inventory Report

Year Constructed   Work Type Description
1911               Built Date

Architect:         Builder:
Landscape Engineer: Architect:

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1911 in the Eastlake neighborhood, and now stands a few parcels west of I-5. The residence is a modest example of the Craftsman style and has fair integrity, due to its fenestration. The residence’s setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a medium pitch cross-gable roof with composition asphalt shingles, supportive wood brackets, and overhanging eaves. The exterior walls are clad with clapboard wood siding on the first floor, wood shingles on the second floor, and board and batten siding within the gable end. The primary facade is asymmetrically divided and two bays wide. The fenestration consists of original wood windows and doors throughout the residence.
