Form/Type: Single Family

Cladding: Wood - Clapboard

Foundation:

Roof Type: Gable - Front Gable

Roof Material: Asphalt / Composition - Shingle

Narrative

Study Unit

Architecture/Landscape Architecture
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1923 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has fair integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Craftsman style. It has a medium pitch clipped front-gable roof with composition asphalt shingles and overhanging eaves. The exterior walls are clad with wood clapboard siding. The primary facade is asymmetrically divided and two bays wide. The fenestration consists of original and non-original wood windows throughout the residence. An attached garage is arranged below the residence.

**Property appears to meet criteria for the National Register of Historic Places:** No

**Property is located in a potential historic district (National and/or local):** No

**Property potentially contributes to a historic district (National and/or local):** No

**Statement of Significance:**

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1912 in the Eastlake neighborhood, and now stands a few parcels west of SR 520. The residence has poor integrity, due to substantial changes to its exterior wall cladding, porch, and fenestration. The residence’s setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**

The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Craftsman and Colonial Revival styles. It has a medium pitch front-gable roof with composition asphalt shingles and overhanging eaves. The exterior walls are clad with non-original aluminum siding, flagstone and original wood shingles, such that it has lost its ability to convey historical significance. The primary facade is asymmetrically divided and three bays wide. The fenestration primarily consists of non-original aluminum sliding doors and windows throughout the residence.

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1923 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance: The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a medium pitch side-gable roof with composition asphalt shingles, supportive wood brackets, and overhanging eaves. The exterior walls are clad in wood clapboard siding with wood shingles within the gable ends. The primary facade is asymmetrically divided and three bays wide. The fenestration consists of original wood windows and doors throughout the residence.

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

**Statement of Significance:**
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1914 in the Eastlake neighborhood, and now stands a few parcels west of SR 520. The residence is a modest example of the Craftsman style and has poor integrity, due to substantial changes to its exterior wall cladding, primary facade, and fenestration. The residence’s setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**
The property contains a two and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Craftsman style. It has a medium pitch front-gable roof with composition asphalt shingles and overhanging eaves. The exterior walls are clad with wood siding and wood shingles. The primary facade is asymmetrically divided and two bays wide. The fenestration consists of non-original vinyl windows throughout the residence. The residence features a second story addition that spans the entire façade.

Narrative

Study Unit: Architecture/Landscape Architecture
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1923 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. The individual property, however, does embody the distinctive characteristics of the Craftsman style and could be the design of a master architect. Based on our evaluation, the property is outside the boundaries of the Roanoke historic district, but does appear individually eligible for listing in the NRHP under Criterion C for its architectural design.

The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a medium pitch side-gable roof with composition asphalt shingles, supportive wood brackets, overhanging eaves, and a large front-gable dormer. The exterior walls are clad with wood clapboard siding and wood shingles. The primary facade is asymmetrically divided and three bays wide. The fenestration consists of original wood windows and doors throughout the residence.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1906 in the Eastlake neighborhood, and now stands a few parcels west of SR 520. The residence has poor integrity, due to substantial changes to its exterior wall cladding, fenestration, and primary facade, such that it no longer has the ability to convey historical significance. The residence's setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

The property contains a two-story single-family residence that has been converted for use as a duplex. It has a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Craftsman style. It has a medium pitch hip roof with composition asphalt shingles and overhanging eaves. The exterior walls are clad with non-original asbestos shingles. The primary facade is symmetrically divided and three bays wide. The fenestration consists of non-original vinyl windows throughout the residence. A detached garage stands to the south of the residence.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1924 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Colonial Revival style. It has a medium pitch side-gable roof with composition asphalt shingles and overhanging eaves. The exterior walls are clad with wood clapboard siding. The primary facade is asymmetrically divided and two bays wide. The fenestration consists of original wood windows throughout the residence.

Narrative

Study Unit Other

Architecture/Landscape Architecture
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1960 in the Eastlake neighborhood, and now stands a few parcels west of SR 520. The apartment building is a modest example of the Modern style and has fair integrity, due to substantial changes to its fenestration. The building’s setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

The property contains a three-story apartment building with a rectangular plan and platform frame wood construction. The building was originally designed in the Modern style. It has a flat roof. The exterior walls are clad in a rough textured stucco finish and a brick veneer. The primary facade is asymmetrically divided and multiple bays wide. The window fenestration is composed of non-original vinyl windows.

Architecture/Landscape Architecture
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1951 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has fair integrity, but is outside the suggested historic district boundaries and its age is beyond the period of significance for that district (1900 to 1940), which would qualify it as an intrusion if it were included within the boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

The property contains a two-story single-family residence with a rectangular plan and platform frame construction. The residence was originally designed with elements of the Minimal Traditional style. It has a medium pitch hip roof with non-original clay tiles and overhanging eaves. The exterior walls are clad with non-original vertical T-1-11 wood siding with an applied fieldstone veneer. The primary facade is asymmetrically divided and three bays wide. The fenestration consists of original wood and non-original windows throughout the residence. A detached garage stands in front of the residence.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1926 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

The property contains a one and a half-story single-family residence with a rectangular plan and platform frame construction. The residence was originally designed in the Tudor Revival style. It has a steeply pitched cross-gable roof with composition asphalt shingles. The exterior walls are clad with rough textured stucco. The primary facade is asymmetically divided and three bays wide. The fenestration consists of original wood windows throughout the residence.

Architecture/Landscape Architecture
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1936 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has poor integrity, due to substantial alterations to its exterior wall cladding, windows, and the connection between the house and garage. It is located outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

The property contains a two-story single-family residence with an L-shape plan and platform frame wood construction. The residence was originally designed in the Colonial Revival style, but has been substantially altered with changes to its exterior wall cladding and windows, and the connection between the house and garage. It has a low pitch hip roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with non-original asbestos siding on the second story and a brick veneer on the first story. The primary facade is asymmetrically divided and three bays wide. The window fenestration is composed of non-original windows throughout the residence. An attached garage stands in front of the residence, creating the L-shape plan.

Historic Property Inventory Report

Property appears to meet criteria for the National Register of Historic Places: Yes

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1953 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has good integrity, but is outside the suggested historic district boundaries and its age is beyond the period of significance for that district (1900 to 1940), which would qualify it as an intrusion if it were included within the boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. The individual property, however, does embody the distinctive characteristics of the Modern style and could be the design of a master architect. Based on our evaluation, the property is outside the boundaries of the Roanoke historic district, but does appear individually eligible for listing in the NRHP under Criterion C for its architectural design.

Description of Physical Appearance:
The property contains a one-story single-family residence with an L-shape plan and platform frame wood construction. The residence was originally designed in the Modern style. It has a flat roof with metal coping. The exterior walls are clad with reverse wood board and batten siding. The primary facade is asymmetrically divided and three bays wide. The window fenestration is composed of original metal windows.

**Property potentially contributes to a historic district (National and/or local):** No

**Statement of Significance:**

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1970 in the Eastlake neighborhood, and now stands a few parcels west of I-5. The building is a good example of the contemporary Modern style and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The building's setting has also been impacted by the construction of I-5 to the east, and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**

The property contains a three-story commercial building with a rectangular plan. The building was originally designed in the Contemporary style. It has a flat roof with a seamed metal mansard parapet. The exterior walls are clad with brick veneer. The primary facade is symmetrically divided and multiple bays wide. The fenestration consists of original wood windows throughout the building.

Tuesday, August 24, 2010
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1908 in the Eastlake neighborhood, and now stands a few parcels west of SR 520. The residence is a modest example of the Craftsman style and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The residence’s setting has also been impacted by the construction of I-5 to the east, and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Craftsman style. It has a medium pitched hip roof with composition asphalt shingles and overhanging eaves. The exterior walls are clad with wood shingles. The primary facade is asymmetrically divided. The fenestration is composed of original wood windows.

</tbody>
</table>

### Architect:  
### Engineer:  
### Builder:  
### Landscape Architect:  
### Property appears to meet criteria for the National Register of Historic Places: No

### Property is located in a potential historic district (National and/or local): No

### Property potentially contributes to a historic district (National and/or local): No

### Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1924 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

### Description of Physical Appearance:
The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Craftsman style. It has a low pitched hipped roof with composition asphalt shingles, a clipped gabled porch shelter, a gabled dormer, and slightly overhanging eaves. The exterior walls are clad with a smooth stucco finish. The dormer is clad with wood shingle. The primary facade is asymmetrically divided and four bays wide. The window fenestration is composed of original wood windows.

Architecture/Landscape Architecture
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1909 in the Eastlake neighborhood, and now stands a few parcels west of SR 520. The residence is a modest example of the Craftsman style and has fair integrity, due to changes to its fenestration. The residence’s setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a medium pitched front-gable roof with decorative wood brackets, overhanging eaves and a gabled dormer. The exterior walls are clad with wood clapboard siding and a rough textured stucco finish with half timbering. The primary facade is symmetrically divided and three bays wide. The fenestration consists of non-original vinyl windows throughout the residence.

Property appears to meet criteria for the National Register of Historic Places: No  
Property is located in a potential historic district (National and/or local): No  
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1926 in the Eastlake neighborhood, and now stands a few parcels west of I-5. The residence is a modest example of the Dutch Colonial Revival style and has poor integrity, due to substantial changes to its exterior wall cladding and fenestration. The residence's setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance: The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Dutch Colonial Revival style. It has a medium pitch gambrel roof with wood shingles. The exterior walls are clad with brick veneer on the first story and rough textured stucco on the second story. The primary facade is asymmetrically divided and two bays wide. The fenestration consists of non-original windows throughout the residence.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR 520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1950 in the Eastlake neighborhood, and now stands a few parcels west of I-5. The residence is a modest example of the Ranch style and has fair integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The residence’s setting has also been impacted by the construction of I-5 to the east, and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

The property contains a one-story single-family residence with an L-shaped plan and platform frame wood construction. The residence was originally designed with elements of the Ranch style. It has a medium pitch cross gable roof with composition asphalt shingles. The exterior walls are clad with a cultured stone veneer, as well as vertical and horizontal wood siding. The primary facade is asymmetrically divided and four bays wide. The fenestration consists of both original metal and non-original metal windows throughout the residence.

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: 
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1959 in the Eastlake neighborhood, and now stands a few parcels west of I-5. The building is a modest example of the Modern style and has fair integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The building’s setting has also been impacted by the construction of I-5 to the east, and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance: 
The property contains a four-story apartment building with a rectangular plan and platform frame construction. The residence was originally designed in the Modern style. It has a flat roof with metal coping and overhanging eaves. The exterior walls are clad with a rough textured stucco finish and brick veneer. The primary facade is asymmetrically divided and multiple bays wide. The fenestration is composed of original and non-original metal windows.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1923 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Dutch Colonial Revival style. It has a low pitched side-gable gambrel roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with wood clapboard siding. The primary facade is symmetrically divided and three bays wide. The window fenestration is composed of original wood windows.

Architecture/Landscape Architecture
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1909 in the Eastlake neighborhood, and now stands a few parcels west of SR 520. The residence is a modest example of the Craftsman style and has poor integrity, due to substantial changes to its exterior wall cladding, fenestration, and a large addition on the north elevation. The residence's setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

The property contains a one and a half-story single-family residence with a rectangular plan and platform frame construction. The residence was originally designed in the Craftsman style. It has a medium pitched front-gable roof with composition roofing, exposed structural elements, a shed roof dormer, and overhanging eaves. The exterior walls are clad with wood siding. The primary facade is asymmetrically divided and three bays wide. The window fenestration is composed of non-original aluminum and vinyl windows.

Architecture/Landscape Architecture
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1925 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. The individual property, however, does embody the distinctive characteristics of the Colonial Revival style. Based on our evaluation, the property is outside the boundaries of the Roanoke historic district, but does appear individually eligible for listing in the NRHP under Criterion C for its architectural design.

The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Colonial Revival style. It has a parallel gable roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with coursed wood shingles. The primary facade is symmetrically divided and three bays wide. The window fenestration is composed of original wood windows.

**Statement of Significance:**

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1906 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has fair integrity, due to alterations to the fenestration, and is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

**Description of Physical Appearance:**

The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally as an American Foursquare in the Craftsman style. It has a medium pitched hip roof with composition asphalt shingles and wide overhanging eaves. The exterior walls are clad with wood clapboard siding. The primary facade is asymmetrically divided and three bays wide. The window fenestration is composed of non-original vinyl windows. An attached one-car basement garage stands below the residence.

The Eastlake neighborhood was first developed in the 1880s. It contains an interesting mixture of apartment buildings, single family residences, houseboats, and commercial structures. Its current boundaries – east of Lake Union, south of University Bridge, west of I-5, and north of Mercer Street - were defined by the construction of I-5, which cut off Eastlake from adjacent Roanoke Park and the rest of Capitol Hill. Much of the history of the Eastlake neighborhood centers on Lake Union and maritime development and industry. In 1916, Boeing’s first factory was located on the shores of Lake Union at the foot of Roanoke Street. However, since 1960s and 1970s, with the construction of I-5, the neighborhood has suffered numerous demolitions, less than sensitive infill construction, and substantial renovations of its older building stock. Many intact historic buildings still remain from the early twentieth century through the 1920s, but these are intermixed with examples of newer construction and extensive remodels mixed. While the Eastlake neighborhood has strong physical boundaries and is a cohesive community, the area of the neighborhood adjacent to I-5 appears unlikely to be eligible as an NRHP or local historic district due to the high number of intrusions and loss of integrity.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1928 in the Eastlake neighborhood. The residence has good integrity and embodies the distinctive characteristics of the Renaissance Revival style with Beaux Arts style elements. Its setting has been somewhat impacted by the construction of I-5 to the east, but it is one of a dwindling few historic apartment buildings that continue to remain intact in the neighborhood. Based on our evaluation, the property appears individually eligible for listing in the NRHP under Criterion C for its architectural design.

The Eastlake neighborhood was first developed in the 1880s. It contains an interesting mixture of apartment buildings, single family residences, houseboats, and commercial structures. Its current boundaries – east of Lake Union, south of University Bridge, west of I-5, and north of Mercer Street - were defined by the construction of I-5, which cut off Eastlake from adjacent Roanoke Park and the rest of Capitol Hill. Much of the history of the Eastlake neighborhood centers on Lake Union and maritime development and industry. In 1916, Boeing’s first factory was located on the shores of Lake Union at the foot of Roanoke Street. However, since 1960s and 1970s, with the construction of I-5, the neighborhood has suffered numerous demolitions, less than sensitive infill construction, and substantial renovations of its older building stock. Many intact historic buildings still remain from the early twentieth century through the 1920s, but these are intermixed with examples of newer construction and extensive remodels mixed. While the Eastlake neighborhood has strong physical boundaries and is a cohesive community, the area of the neighborhood adjacent to I-5 appears unlikely to be eligible as an NRHP or local historic district due to the high number of intrusions and loss of integrity.

The property contains a two-story apartment building with a rectangular plan and unreinforced masonry construction. The building was originally designed in the Renaissance Revival style with Beaux Arts style elements. It has a flat roof with a parapet and decorative terra cotta cornice. The exterior walls are clad with brick. The primary facade is symmetrically divided and three bays wide. The fenestration consists of original wood frame window windows with leaded glass panes throughout the building.

**Tuesday, August 24, 2010**
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1923 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has poor integrity, due to changes to the windows and exterior wall cladding. It is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Colonial Revival style. It has a medium pitch clipped gable roof with composition asphalt shingles and overhanging eaves. The exterior walls are clad with applied asbestos siding and T1-11 siding. The primary facade is asymmetrically divided and two bays wide. The window fenestration is composed of non-original wood windows.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1939 in the Eastlake neighborhood, and now stands a few parcels west of I-5. The building is a modest example of the Contemporary Modern style and has poor integrity, due to substantial changes to its exterior wall cladding and fenestration. The building's setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

The property contains a one-story commercial building with a rectangular plan and platform frame construction. The building has been substantially altered and appears to have been rehabilitated in the Contemporary Modern style. It has a flat roof with a large seamed metal mansard parapet. The exterior walls are clad with brick and clay tile veneer. The primary facade is asymmetrically divided and three bays wide. The fenestration consists of original windows throughout the building.

Property appears to meet criteria for the National Register of Historic Places: No  
Property is located in a potential historic district (National and/or local): No  
Property potentially contributes to a historic district (National and/or local): No  

Statement of Significance:  
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1954 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has fair integrity, but is outside the suggested historic district boundaries and its age is beyond the period of significance for that district (1900 to 1940), which would qualify it as an intrusion if it were included within the boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance:  
The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. It was originally designed with elements of the Ranch style. It has a side gable roof clad with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with wood clapboard siding. The primary facade is asymmetrically divided and three bays wide. A non-original porch addition has been added to the primary facade.

This property inventory report provides a detailed assessment of the eligibility of a property for listing in the National Register of Historic Places. The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1923 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has good integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Colonial Revival style. It has a medium pitch side-gable roof with composition shingles, two eyebrow dormers, and overhanging eaves. The exterior walls are clad with wood siding. The primary facade is symmetrically divided and three bays wide. A full width deck spans the facade. The window fenestration is composed of original wood windows.

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1965 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has fair integrity, is outside the suggested historic district boundaries, and its age is beyond the period of significance for that district (1900 to 1940), which would qualify it as an intrusion if it were included within the boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance: The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in a vernacular Modern style. It has a medium pitch side-gable roof and a shed roof with composition asphalt shingles, exposed rafter tails, and overhanging eaves. The exterior walls are clad with vertical wood siding. The primary facade is asymmetrically divided and three bays wide. The window fenestration is composed of original metal windows. A detached one-story garage of wood construction stands on the property.

Landscape Architect: 
Engineer: 

Property appears to meet criteria for the National Register of Historic Places: Yes
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1901 in the Eastlake neighborhood. The residence has good integrity and embodies the distinctive characteristics of the Queen Anne style as constructed in the Eastlake neighborhood in the early twentieth century. Its setting has been somewhat impacted by the construction of I-5 to the east, but it is one of a dwindling few historic residences that continue to remain intact in the neighborhood. Based on our evaluation, the property appears individually eligible for listing in the NRHP under Criterion C for its architectural design.

The Eastlake neighborhood was first developed in the 1880s. It contains an interesting mixture of apartment buildings, single family residences, houseboats, and commercial structures. Its current boundaries – east of Lake Union, south of University Bridge, west of I-5, and north of Mercer Street - were defined by the construction of I-5, which cut off Eastlake from adjacent Roanoke Park and the rest of Capitol Hill. Much of the history of the Eastlake neighborhood centers on Lake Union and maritime development and industry. In 1916, Boeing’s first factory was located on the shores of Lake Union at the foot of Roanoke Street. However, since 1960s and 1970s, with the construction of I-5, the neighborhood has suffered numerous demolitions, less than sensitive infill construction, and substantial renovations of its older building stock. Many intact historic buildings still remain from the early twentieth century through the 1920s, but these are intermixed with examples of newer construction and extensive remodels mixed. While the Eastlake neighborhood has strong physical boundaries and is a cohesive community, the area of the neighborhood adjacent to I-5 appears unlikely to be eligible as an NRHP or local historic district due to the high number of intrusions and loss of integrity.

Description of Physical Appearance:
The property contains a two-story single-family residence with a T-shaped plan and platform frame wood construction. The residence was originally designed in the Queen Anne style. It has a medium pitch cross-gable roof with composition asphalt shingles and decorative fascia boards. The exterior walls are clad with wood shingles. The primary facade is three bays wide and features a wrap around porch. The fenestration consists of original wood windows throughout the residence. A non-original addition was added to the rear of the property.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1918 in the Eastlake neighborhood, and now stands a few parcels west of I-5. The residence has a vernacular design and good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The residence's setting has also been impacted by the construction of I-5 to the east, and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Vernacular style. It has a medium pitch side-gable roof with composition roofing, supportive wood brackets and overhanging eaves. The exterior walls are clad with brick. The primary facade is asymmetrically divided and three bays wide. The fenestration is composed of both original wood and non-original metal windows. A detached one-story garage of wood construction stands on the property.

**Statement of Significance:** The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1926 in the Eastlake neighborhood. The residence has good integrity and embodies the distinctive characteristics of the Renaissance Revival style with Beaux Arts style elements as constructed in the Eastlake neighborhood in the early twentieth century. Its setting has been somewhat impacted by the construction of I-5 to the east, but it is one of a dwindling few historic apartment buildings that continue to remain intact in the neighborhood. Based on our evaluation, the property appears individually eligible for listing in the NRHP under Criterion C for its architectural design. The Eastlake neighborhood was first developed in the 1880s. It contains an interesting mixture of apartment buildings, single family residences, houseboats, and commercial structures. Its current boundaries – east of Lake Union, south of University Bridge, west of I-5, and north of Mercer Street - were defined by the construction of I-5, which cut off Eastlake from adjacent Roanoke Park and the rest of Capitol Hill. Much of the history of the Eastlake neighborhood centers on Lake Union and maritime development and industry. In 1916, Boeing’s first factory was located on the shores of Lake Union at the foot of Roanoke Street. However, since 1960s and 1970s, with the construction of I-5, the neighborhood has suffered numerous demolitions, less than sensitive infill construction, and substantial renovations of its older building stock. Many intact historic buildings still remain from the early twentieth century through the 1920s, but these are intermixed with examples of newer construction and extensive remodels mixed. While the Eastlake neighborhood has strong physical boundaries and is a cohesive community, the area of the neighborhood adjacent to I-5 appears unlikely to be eligible as an NRHP or local historic district due to the high number of intrusions and loss of integrity.

**Description of Physical Appearance:** The property contains a three-story apartment building with a rectangular plan and unreinforced masonry construction. The residence was originally designed in the Renaissance Revival style with Beaux Arts style elements. It has a flat roof with a stepped parapet and metal coping. The exterior walls are clad with brick. The primary facade is symmetrically divided and three bays wide. The fenestration consists of original wood windows throughout the residence.

Architecture/Landscape Architecture
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1925 in the Eastlake neighborhood, and now stands a few parcels west of I-5. The residence is a good example of the Spanish Colonial Revival style, but it has fair integrity due to window replacements. The residence’s setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

The property contains a two-story multiple-family residence with a rectangular plan and platform frame wood construction. The residence, called the Buena Vista Apartments, was originally designed in the Spanish Colonial Revival style. It has a flat roof with a stepped parapet and clay tile coping. The exterior walls are clad with a smooth stucco finish. The primary facade is symmetrically divided and three bays wide. The fenestration primarily consists of original wood windows with several non-original window replacements.

Architecture/Landscape Architecture

**Other**  

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1922 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has fair integrity, due to changes to the fenestration, and is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

The property contains a one-story single-family residence with an L-shaped plan and platform frame wood construction. The residence was originally designed with elements of the Craftsman style. It has a hip roof with overhanging eaves. The exterior walls are clad with wood shingles. The primary facade is asymmetrically divided. The window fenestration is composed of non-original metal windows.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1958 in the Eastlake neighborhood. The building has good integrity and embodies the distinctive characteristics of the International style as constructed in the Eastlake neighborhood in the mid twentieth century. It is an uncommon example of this style and could be the design of a master architect. Based on our evaluation, the property appears individually eligible for listing in the NRHP under Criterion C for its architectural design.

The Eastlake neighborhood was first developed in the 1880s. It contains an interesting mixture of apartment buildings, single family residences, houseboats, and commercial structures. Its current boundaries – east of Lake Union, south of University Bridge, west of I-5, and north of Mercer Street - were defined by the construction of I-5, which cut off Eastlake from adjacent Roanoke Park and the rest of Capitol Hill. Much of the history of the Eastlake neighborhood centers on Lake Union and maritime development and industry. In 1916, Boeing’s first factory was located on the shores of Lake Union at the foot of Roanoke Street. However, since 1960s and 1970s, with the construction of I-5, the neighborhood has suffered numerous demolitions, less than sensitive infill construction, and substantial renovations of its older building stock. Many intact historic buildings still remain from the early twentieth century through the 1920s, but these are intermixed with examples of newer construction and extensive remodels mixed. While the Eastlake neighborhood has strong physical boundaries and is a cohesive community, the area of the neighborhood adjacent to I-5 appears unlikely to be eligible as an NRHP or local historic district due to the high number of intrusions and loss of integrity.

The property contains a eight-story apartment building, Coronado Apartments, with a rectangular plan and steel frame construction. The residence was originally designed in the International style. It has a flat roof and exterior hallways. The exterior walls are clad with concrete and a wood siding veneer. The primary facade is asymmetrically divided and multiple bays wide. The fenestration consists of original metal windows throughout the building.

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed circa 1950 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has good integrity, but is outside the suggested historic district boundaries and its age is beyond the period of significance for that district (1900 to 1940), which would qualify it as an intrusion if it were included within the boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Ranch style. It has a low pitched hip roof with composition shingles and slightly overhanging eaves. The exterior walls are clad with a brick veneer. The primary facade is asymmetrically divided and multiple bays wide. The window fenestration is composed of original wood windows. The residence features an attached one-car garage.

Architecture/Landscape Architecture
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1923 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has fair integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Craftsman style. It has a medium pitch side-gable roof with composition asphalt shingles, decorative wood brackets, and overhanging eaves. The exterior walls are clad with wood clapboard siding. The primary facade is asymmetrically divided and two bays wide. The fenestration is composed of original wood windows.

Historic Property Inventory Report

Year Constructed: 1945
Work Type Description: Built Date

Architect:

Builder:

Landscape Architect:

Engineer:

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1945 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has fair integrity, due to changes to the windows. It is outside the suggested historic district boundaries and its age is beyond the period of significance for that district (1900 to 1940), which would qualify it as an intrusion if it were included within the boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

Description of Physical Appearance:
The property contains a one-story single-family residence with an L-shaped plan and platform frame construction. The residence was originally designed in the Ranch style. It has a medium pitch cross-gable roof with composition shingles and slightly overhanging eaves. The exterior walls are clad with a brick veneer. The primary facade is asymmetrically divided and four bays wide. The window fenestration is composed of original wood and non-original windows.

Architecture/Landscape Architecture
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1942 in the Eastlake neighborhood, and now stands a few parcels west of I-5. The building has a vernacular design. Its integrity is fair, due to alterations to the building’s cornice. The building’s setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

The property contains a two-story apartment building with a rectangular plan and platform frame wood construction. The building has a vernacular design. It has a flat roof. The exterior walls are clad with brick. The primary facade is symmetrically divided and three bays wide. The fenestration consists of original wood windows throughout the building.

### Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1924 in an area located adjacent (to the east) of the potential Roanoke historic district. The residence has fair integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

### Description of Physical Appearance:
The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Dutch Colonial Revival style. It has a medium pitch, clipped cross-gable roof with composition asphalt shingles, exposed rafter tails, and overhanging eaves. The exterior walls are clad with wood clapboard siding. The window fenestration is composed of original wood and non-original windows.

Landscape Architect:

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1957 in the Eastlake neighborhood, and now stands a few parcels west of I-5. The building is a modest example of the International style and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The building’s setting has also been impacted by the construction of I-5 to the east, and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a five-story apartment building with an L-shape plan and steel frame construction. The building was originally designed in the International style. It has a flat roof with metal coping. The exterior walls are finished in concrete. The primary facade is asymmetrically divided and multiple bays wide. The fenestration consists of original metal windows throughout the building.

Other
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1919 in an area located adjacent (to the northeast) of the potential Roanoke historic district. The residence has fair integrity, but is outside the suggested historic district boundaries. The area where this house is located is separated from the historic district by abrupt changes in the topography, and tends to contain much more new construction. Few of the extant houses in the immediate area that date from before 1971 are architecturally distinguished, and this house and its immediately neighboring structures do not form a cohesive grouping that conveys the historic significance of the community. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributor to a potential historic district.

The property contains a two-story single-family residence with an L-shape plan and platform frame wood construction. The residence was originally designed in the Tudor Revival style. It has a steeply pitched cross-gable roof with composition asphalt shingles, a large shed roof dormer, and slightly overhanging eaves. The exterior walls are clad with a brick veneer and smooth stucco finish with half timbering. The primary facade is asymmetrically divided and three bays wide. The fenestration consists of original wood windows throughout the residence.
