Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1912 in the eastern portion of the Wallingford neighborhood, and now stands immediately west of I-5. The residence has good integrity, but is a modest example of an American Foursquare type residence constructed with elements of the Craftsman and Colonial Revival styles. Its setting has also been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance: The property contains a two and a half-story single-family residence with a rectangular plan and platform frame construction. The residence was originally designed in the American Foursquare style with elements of Colonial Revival and Craftsman styles. The primary façade is asymmetrically divided into two parts. It has a medium pitch hip roof with composition asphalt shingles and hip roof dormer. The exterior walls are clad with wood clapboard siding. The fenestration consists of original wood windows and non-original vinyl windows throughout the residence.

Historic Property Inventory Report

Year Constructed  Work Type Description
1919  Built Date

Architect:  Builder:
Landscape Architect:  Engineer:

Property appears to meet criteria for the National Register of Historic Places: Yes
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1919 in the eastern portion of the Wallingford neighborhood, and now stands immediately west of I-5. The residence has good integrity and is a good example of the Craftsman style. Its setting has also been impacted by the construction of I-5 to the east, and it is not located in a cohesive neighborhood. However, it embodies the characteristics of the Craftsman style and is one of a dwindling number of intact residences in the neighborhood. Based on our evaluation, the property appears eligible for individual listing in the NRHP under Criterion C for its architectural design.

Description of Physical Appearance: The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. The primary façade is asymmetrically divided and two bays wide. It has a medium pitch side-gable roof with composition asphalt shingles and gabled roof dormer. The exterior walls are clad with wood clapboard siding. The fenestration consists of original wood windows throughout the residence.

Landscape Architect:  
Engineer:  

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1921 in the eastern portion of the Wallingford neighborhood, and now stands immediately west of I-5. The residence has fair integrity, due to alterations to its exterior wall cladding and windows, and is a modest example of a residence constructed with Craftsman style elements. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance: The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. The primary façade is asymmetrically divided and two bays wide. It has a medium pitch side gable roof with composition asphalt shingles and exposed structural elements. The exterior walls are clad with non-original aluminum siding. The fenestration consists of a combination of original wood windows and non-original vinyl windows.

Architect: Builder:  
Landscape Architect: Engineer:  

Property appears to meet criteria for the National Register of Historic Places: No  
Property is located in a potential historic district (National and/or local): No  
Property potentially contributes to a historic district (National and/or local): No  

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1915 in the eastern portion of the Wallingford neighborhood, and now stands immediately west of I-5. The residence has good integrity, but is a modest example of an American Foursquare type residence constructed in the Colonial Revival style. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance: The property contains a two-story single-family residence with a rectangular plan and platform frame construction. The residence was originally designed in the American Foursquare/Colonial Revival style. The primary façade is symmetrically divided and three bays wide. It has a medium pitch front-gable roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with wood clapboard siding. The fenestration consists of original wood windows throughout the residence.

Property appears to meet criteria for the National Register of Historic Places: Yes  
Property is located in a potential historic district (National and/or local): No  
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1966 in the western portion of the University District, and now stands a few parcels east of I-5. The building is a good example of the Modern style and has good integrity. The building’s setting has been impacted by the construction of I-5 to the east, and it is not located in a cohesive neighborhood. However, it is singularly distinctive as a Modern style apartment building from the mid-1960s and could be the work of a master architect. Based on our evaluation, the property appears eligible for listing in the NRHP individually under Criterion C for its architectural design.

Description of Physical Appearance: The property contains a two-story apartment building on top of commercial businesses and a parking garage with a rectangular plan, reinforced concrete and steel frame construction. The building was originally designed in the Modern style. It has a flat roof with rolled asphalt cladding. The exterior walls are clad with T-1-11 and concrete accents. The primary facade is symmetrically divided and multiple bays wide. The fenestration consists of a mixture of both original and non-original windows throughout the building.

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1971 in the western portion of the University District, and now stands a few parcels east of I-5. The building is a modest example of the Modern style in a high rise apartment building and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The building's setting has also been impacted by the construction of I-5 to the west and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains an eleven-story apartment building with a rectangular plan and reinforced concrete construction. The building was originally designed in the Modern style. It has a flat roof with metal coping. The exterior walls are clad with brick. The primary facade is asymmetrically divided and six bays wide. The window fenestration is composed of original aluminum sliding windows.

**Property appears to meet criteria for the National Register of Historic Places:** No

**Property is located in a potential historic district (National and/or local):** No

**Property potentially contributes to a historic district (National and/or local):** No

**Statement of Significance:**

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1925 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a modest example of the Craftsman style and has fair integrity, due to several window replacements. The residence's setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**

The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a medium pitched side-gable roof with overhanging eaves, exposed rafter tails, supportive wood brackets, a gable roof dormer, and composition asphalt shingles. The exterior walls are clad with wood clapboard siding. The primary facade is asymmetrically divided and three bays wide. The fenestration consists primarily of original wood windows, but many have been replaced with non-original aluminum windows.

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1917 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a modest example of the Craftsman style and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The residence's setting has also been impacted by the construction of I-5 to the west and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a medium pitched front-gable roof with overhanging eaves, exposed rafter tails, wood brackets, and composition asphalt shingles. The exterior walls are clad with wood clapboard siding and wood shingles. The primary facade is asymmetrically divided and two bays wide. The residence has been boarded up. Thus, the window fenestration is almost entirely obscured. The one visible window is an original multi-light wood sash.

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was originally constructed in 1923 as an automobile garage in the western portion of the University District, and was converted for use as a tavern in 1934. It is best known as the being the location of the Blue Moon Tavern. The Blue Moon Tavern first occupied the building at 712 NE 45th Street in April 1934, and continues to have this use. Founded by Hank Reverman and Monty Fairchild, the tavern has long been a popular gathering place for University of Washington students. In the 1930s, state law prohibited the sale of alcohol within 1 mile of the campus and the Blue Moon was one of the closest establishments to sell beer. Maude Walsh (1906-1968) and Vera McCracken acquired the tavern in 1940. Under their ownership, the Blue Moon was one of the rare bars outside of downtown Seattle to serve African American servicemen during World War II. During the 1950s and 1960s, the tavern was owned by Jack and Jim David and, later, Stanford Poll (1940-2000), and became a popular gathering place for an assortment of political radicals, artists, writers, beatniks, and hippies. Poets Theodore Roethke (1901-1963), Richard Hugo (1924-1982), Carolyn Kizer (b. 1925), Stanley Kunitz (1905-2006), and David Wagoner were regular patrons, and notables such as Dylan Thomas (1914-1953) and Allen Ginsberg (1926-1997) were frequent visitors. The Blue Moon was eventually expanded in the late 1960s to accommodate its popularity as a center for Seattle’s emerging counterculture. After a long decline in 1970s, the Blue Moon experienced a revival in popularity in the 1980s after being purchased by Three Fools, Inc. Subsequent owners proposed to demolish the tavern and redevelop the property in 1989, which led to a failed campaign to secure landmark status for the Blue Moon in 1990. Despite this setback, the developers were persuaded to spare the tavern and a long term lease secured.

Originally constructed as a 1920s automobile garage, the building retains elements of the Renaissance Revival style. Sometime after its conversion to a tavern, however, substantial alterations were made to its storefronts, and its interior has experienced numerous renovations. Due to these changes, the building’s integrity is considered poor and insufficient to convey historical significance. The building’s setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

The property contains a one-story commercial building with a rectangular plan and unreinforced masonry construction. The building was originally designed as an automobile garage with elements of the Renaissance Revival style. It has a flat roof with concrete coping and a shallow parapet. The street-facing walls are clad in roman brick. The primary facade is symmetrically divided into two sections with their own individual entry flanked by picture windows. The fenestration consists of non-original windows on the south elevation.

Historic Property Inventory Report

Year Constructed | Work Type Description
--- | ---
1923 | Built Date

Architect: [Name]
Builder: [Name]
Landscape Architect: [Name]
Engineer: [Name]

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1923, and now stands a few parcels east of I-5. The building has been substantially altered and has poor integrity, due to substantial changes to its exterior wall cladding and fenestration. The building’s setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a one-story commercial building with a rectangular plan and masonry construction. The building appears to have been substantially altered from its original design and now exhibits Modern style elements. It has a flat roof with pitched roof parapet. The exterior walls are clad with cut stone tiles and a smooth stucco finish. The primary facade is asymmetrically divided and seven bays wide. The window fenestration is composed of metal windows.

Property appears to meet criteria for the National Register of Historic Places: Unable to Determine

Property is located in a potential historic district (National and/or local): Unable to Determine

Property potentially contributes to a historic district (National and/or local): Unable to Determine

Statement of Significance: Formerly the home of the Eldridge Buick Company, this building was purchased by J.E. Blume in 1935 as the new home of the University Chevrolet Co. (University Motors). Schack, Young and Myers was a well-known Seattle firm of architects and engineers who designed many commercial buildings in the 1920s. The firm designed several other buildings in the University District including the Theta Xi Fraternity, the Gelb Building on University Way, and the University Baptist Church on 12th Avenue NE. James Hansen Schack and David John Myers were architects, and Arrigo M. Young was an engineer. The firm was founded in 1920, and Myers left the firm in 1929. Most designs by Schack, Young & Myers were in academic eclectic styles.

Description of Physical Appearance: The Eldridge Buick/University Chevrolet Building is a large one-story structure in the Mediterranean Revival style. Decorative rounded pediments and red tile characterize the roofline. Decorative brackets support the cornice, below which is a fluted frieze decorated with medallions. Spiral engaged columns with classical capitals divide the storefront windowpanes, which have been replaced. Transom windows have been painted over, but they remain intact. The building has been extensively remodeled with the addition of the Metro Cinemas to the rear.

Property appears to meet criteria for the National Register of Historic Places: Yes
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1926 in what is now the University District to house an automobile dealership. It has since been converted for use as commercial retail space. The building has some altered window openings, but otherwise retains good integrity. It embodies the distinctive characteristics of the Spanish Colonial Revival style in a commercial retail building, and continues to convey a strong association with the early automobile industry in Seattle during the 1920s. Based on our evaluation, the property appears individually eligible for listing in the NRHP under Criteria A and C.

Description of Physical Appearance:
The property contains a one-story commercial building with an irregular plan and concrete construction with glazed terra cotta tile cladding. The building was originally designed in the Spanish Colonial Revival style. The building wraps around a corner and has a flat roof with a pitched clay tile roof parapet (mansard). The concrete pilasters and arched entrances are parged. The primary facade is asymmetrically divided and multiple bays wide. The fenestration consists of a combination of both original and non-original windows throughout the building, including original divided light transom windows.

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1970 in the western portion of the University District, and now stands a few parcels east of I-5. The building has a vernacular Modern design and good integrity. However, it does not appear to embody distinctive characteristics or a method of construction that would warrant special recognition. The building's setting has also been impacted by the construction of I-5 to the west, and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a one-story commercial bank building with a rectangular plan and concrete and brick construction. The building was originally designed in the Modern style. It has a flat roof with rolled asphalt. The exterior walls are clad with a brick veneer. The primary facade is asymmetrically divided. The fenestration consists of original metal windows throughout the building.

Engineer: 

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1959 in the east portion of the Wallingford neighborhood, and now stands immediately west of I-5. The building has fair integrity, due to the removal and replacement of its windows and alterations to its exterior wall cladding. It is a modest example of a postwar apartment building constructed in the Modern style, but it is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a 3-story apartment building with a rectangular plan and platform frame wood construction. The building was originally designed with elements of the Modern style. It has a flat roof with asphalt composition built-up roofing and overhanging eaves. The exterior walls are clad with a combination of common bond oversized brick, stucco, and wood T-1-11 siding. The fenestration consists of non-original vinyl windows throughout the building.

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1922 in the western portion of the University District, and now stands a few parcels east of I-5. The residence has a vernacular design and has poor integrity, due to substantial changes to its exterior wall cladding, porch, and fenestration. The residence’s setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a one and a half-story single-family residence with a rectangular plan and platform frame construction. The residence was originally designed in the Vernacular style. It has a medium pitch cross gable roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with asbestos shingles. The primary facade is symmetrically divided and one bay wide. The fenestration consists of non-original vinyl windows throughout the residence.

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1918 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a good example of the Craftsman style and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The residence’s setting has also been impacted by the construction of I-5 to the west and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance: The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a medium pitch hipped roof with composition asphalt shingles, exposed structural elements and a gable roof dormer. The exterior walls are clad with wood clapboard siding and wood shingles. The primary facade is asymmetrically divided and two bays wide. The fenestration consists of original wood windows throughout the residence.

**Engineer:**

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

**Statement of Significance:**
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1918 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a modest example of the Colonial Revival style and has poor integrity, due to substantial changes to its exterior wall cladding and fenestration. The residence's setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**
The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Colonial Revival style. It has a steeply pitched front-gable roof with composition asphalt shingles and overhanging eaves. The exterior walls are clad with non-original vinyl siding. The primary facade is asymmetrically divided and two bays wide. The fenestration primarily consists of non-original windows throughout the residence.

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

**Statement of Significance:**

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1921 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a modest example of the Craftsman style and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The residence's setting has also been impacted by the construction of I-5 to the west and is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**

The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a medium pitch front-gable roof with composition asphalt shingles and exposed structural elements. The exterior walls are clad with wood clapboard siding and wood shingles. The primary facade is asymmetrically divided and two bays wide. The fenestration consists of original wood windows throughout the residence.

Landscape Architect: [Landscape Architect Name]

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1900 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a modest example of the Colonial Revival style and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The residence's setting has also been impacted by the construction of I-5 to the west and is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a one-story single-family residence with a rectangular plan and platform frame construction. The residence was originally designed in the Colonial Revival style. It has a medium pitch clipped side-gable roof with composition asphalt shingles and boxed eaves. The exterior walls are clad with wood clapboard siding. The primary facade is symmetrically divided and three bays wide. The fenestration consists of original wood windows throughout the residence.

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1912 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a modest example of the Craftsman style and has fair integrity, due the removal and replacement of its windows. The residence's setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Craftsman style. It has a low pitch hip roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad in wood clapboard siding. The primary facade is asymmetrically divided and two bays wide. The fenestration consists of non-original vinyl windows throughout the residence.

### Statement of Significance:

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1907 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a modest example of the Queen Anne style and has poor integrity, due to substantial changes to its exterior wall cladding and fenestration. The residence’s setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

### Description of Physical Appearance:

The property contains a one-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Queen Anne style. It has a medium pitch hip roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with non-original asbestos shingles. The primary facade is asymmetrically divided and two bays wide. The fenestration consists of non-original vinyl windows throughout the residence.

Property appears to meet criteria for the National Register of Historic Places: Yes
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1925 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a good example of the Dutch Colonial Revival style and has good integrity, despite alterations to its exterior wall cladding and fenestration. The residence’s setting has also been impacted by the construction of I-5 to the west, and it is not located in a cohesive neighborhood. However, the residence appears to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears individually eligible for listing in the NRHP under Criterion C for its architectural design.

Description of Physical Appearance:
The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Dutch Colonial Revival style. It has a medium pitch front-gable gambrel roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad in wood clapboard siding on the first floor with wood shingles on the second floor. The primary facade is symmetrically divided and three bays wide. The fenestration consists of both original wood and non-original aluminum sliding windows throughout the residence.

**Property appears to meet criteria for the National Register of Historic Places:** No

**Property is located in a potential historic district (National and/or local):** No

**Property potentially contributes to a historic district (National and/or local):** No

**Statement of Significance:**
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1908 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a modest example of the Craftsman style and fair integrity, due to substantial changes to its fenestration. The residence's setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**
The property contains a one and a half-story single-family residence with a rectangular plan and platform frame construction. The residence was originally designed in the Tudor Revival style. It has a steeply pitched side-gable roof with composition asphalt shingles, a shed roof dormer and wide eaves. The exterior walls are clad with wood clapboard siding and wood shingles. The primary facade is asymmetrically divided and two bays wide. The fenestration consists of non-original windows throughout the residence.

Architect:  
Builder:  
Landscape Architect:  
Engineer:  

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1926 in the University District, and now stands a few parcels east of I-5. The building exhibits Art Deco style influences but has poor integrity, due to substantial changes to its storefronts and fenestration. The building’s setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a three-story commercial building with a rectangular plan. The building was originally designed with elements of the Art Deco style. It has a flat roof with a low parapet. The exterior walls are clad with concrete and a brick veneer. The primary facade is symmetrically divided and three bays wide. The fenestration consists of non-original windows throughout the building.

**Statement of Significance:**
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1905 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a good example of the Dutch Colonial Revival style and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The residence's setting has also been impacted by the construction of I-5 to the west and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**
The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Dutch Colonial Revival style. It has a clipped front-gable roof with composition asphalt shingles, a shed roof dormer, and slightly overhanging eaves. The exterior walls are clad with coursed wood shingles. The primary facade is asymmetrically divided and three bays wide. The fenestration consists primarily of original wood windows. However, several have been replaced with non-original vinyl windows. A detached two-stall garage stands behind the residence.

**Landscape Architect:**

**Engineer:**

Property appears to meet criteria for the National Register of Historic Places: Yes

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

**Statement of Significance:**

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. The original building on the property was constructed in 1924, followed by two large additions in 1967. The entire complex of buildings now stands a few parcels east of I-5 in the University District. The oldest building is a good example of a commercial storefront from the 1920s and has good integrity. The other portions of the property lack architectural distinction. The property’s setting has been impacted by the construction of I-5 to the east. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Despite these conditions, based on our evaluation, the 1924 building on the property appears individually eligible for listing in the NRHP under Criterion C for its architectural design.

**Description of Physical Appearance:**

The property contains three connected one-story commercial structure, each with a rectangular plan and platform frame wood construction. The northernmost structure was constructed first, followed by the other two as a single addition. The three structures form a single property, which has a vernacular design. The northernmost structure has a flat roof with concrete coping and a shallow parapet. The exterior walls are clad in a brick veneer. The primary facade is asymmetrically divided and two bays wide. The fenestration consists of original wood windows. The central structure has a flat roof with a simple parapet. The exterior walls are clad in vertical board siding. The primary façade is asymmetrically composed and three bays wide. The fenestration consists of original metal windows. The southernmost structure is set far back from the street and has a flat roof with exposed rafter tails. The exterior walls are clad with vertical board siding. The primary façade is asymmetrically composed and seven bays wide. The fenestration consists of original metal windows and doors.

Architect:         Builder:  
Landscape Engineer:  
Architect:  

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1939 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a modest example of the Tudor Revival style and has fair integrity, due to changes to its fenestration and an enclosed basement level garage. The residence’s setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Tudor Revival style. It has a medium pitch cross-gable roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with brick. The primary facade is asymmetrically divided and three bays wide. The fenestration consists of original wood windows, many of which have been replaced with non-original metal sliding windows.

Engineer:  

Property appears to meet criteria for the National Register of Historic Places: No  
Property is located in a potential historic district (National and/or local): No  
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:  
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1911 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a modest example of the Craftsman style and has poor integrity, due to substantial changes to its fenestration and small changes to the front porch and exterior wall cladding. The residence's setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:  
The property contains a two and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a medium pitch front-gable roof with composition asphalt shingles, a gable roof dormer, and exposed structural elements. The exterior walls are clad with coursed shingle siding. The primary facade is asymmetrically divided and two bays wide. The fenestration consists of non-original vinyl windows throughout the residence.

Architecture/Landscape Architecture
Historic Property Inventory Report

Year Constructed: 1969
Work Type Description: Built Date

Architect: Builder:
Landscape Architect: Engineer:

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1969 in the University District, and now stands a few parcels east of I-5. The building is a modest example of the Contemporary Modern and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The building’s setting has also been impacted by the construction of I-5 to the west, and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a two-story commercial building with a rectangular plan and platform frame wood construction. The building was originally designed in the Contemporary Modern style. It has a flat roof with mansard parapet clad in wood shingle and accented with metal coping. The exterior walls are clad with a brick veneer at the water table and wood shingles above. The primary facade is asymmetrically divided and multiple bays wide. The fenestration is composed of original windows.

Historic Property Inventory Report

<table>
<thead>
<tr>
<th>Year Constructed</th>
<th>Work Type Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1962</td>
<td>Built Date</td>
</tr>
</tbody>
</table>

Architect: 
Builder: 
Landscape 
Engineer: 

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1962 in the University District, and now stands a few parcels east of I-5. The building is a modest example of the Modern style and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The residence’s setting has also been impacted by the construction of I-5 to the east, and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a four-story hotel, University Inn. It consists of two connected structures. The northern building has a rectangular plan and was originally designed in the Modern style. It has a flat roof with concrete coping and a centered vertically projecting stairwell enclosure. The exterior walls are clad with stucco and concrete block. The primary facade is asymmetrically divided and three bays wide. The fenestration consists of original and non-original metal windows throughout the building. The southern building also has a rectangular plan and was designed in the Contemporary Modern style. It has a flat roof with an angled projecting parapet. The primary façade is asymmetrically composed and multiple bays wide. The fenestration consists of original windows throughout the building.

Engineer:  

Property appears to meet criteria for the National Register of Historic Places: No  
Property is located in a potential historic district (National and/or local): No  
Property potentially contributes to a historic district (National and/or local): No  

Statement of Significance:  

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1910 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a modest example of the Dutch Colonial Revival style and has poor integrity, due to substantial changes to its fenestration and front porch. The residence’s setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:  
The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Dutch Colonial Revival style. It has a gambrel roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with wood clapboard siding. The primary facade is asymmetrically divided and two bays wide. The fenestration consists of non-original windows throughout the residence.

Property appears to meet criteria for the National Register of Historic Places: Yes  
Property is located in a potential historic district (National and/or local): No  
Property potentially contributes to a historic district (National and/or local): No  

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1910 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a good example of the Craftsman style and has good integrity, despite changes to its fenestration. The residence's setting has been impacted by the construction of I-5 to the west, and it is not located in a cohesive neighborhood. However, the residence embodies distinctive characteristics of the Craftsman style and is one of a dwindling number of intact residences in the neighborhood. Based on our evaluation, the property appears individually eligible for listing in the NRHP under Criterion C for its architectural design.

Description of Physical Appearance: The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. The primary façade is asymmetrically divided. It has a medium pitch side-gable roof with composition asphalt shingles and exposed structural elements. The exterior walls are clad with wood shingles. The fenestration consists of original wood window, many of which have been replaced with vinyl storm windows.

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

**Statement of Significance:**

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1962 in the western portion of the University District, and now stands a few parcels east of I-5. The apartment building is a modest example of the Modern style and has good integrity. However, it does not appear to embody distinctive characteristics or a method of construction that would warrant special recognition. The building's setting has also been impacted by the construction of I-5 to the west and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**

The property contains a two-story multiple-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Modern style. It has a low pitch side-gable roof with composition asphalt shingles and wide overhanging eaves. The exterior walls are clad in a rough textured stucco and brick veneer. The primary facade is asymmetrically divided and multiple bays wide. The fenestration consists of original metal windows throughout the residence. An open-air garage stands on the first floor of the residence, sheltered by the second story overhang.

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

**Statement of Significance:**
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1905 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a modest example of the Queen Anne style and has poor integrity, due to substantial changes to its exterior wall cladding and fenestration. The residence's setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**
The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Queen Anne style. The primary façade is asymmetrically divided and one bay wide. It has a steeply pitched front-gable roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with non-original coursed wood shingles and wood clapboard siding in the gable ends. The fenestration consists of non-original wood windows, including several that have been enclosed.

**Architect:** 

Property appears to meet criteria for the National Register of Historic Places: **No**

Property is located in a potential historic district (National and/or local): **No**

Property potentially contributes to a historic district (National and/or local): **No**

**Statement of Significance:**
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1916 in the western portion of the University District, and now stands a few parcels east of I-5. The residence has poor integrity because its exterior wall cladding was replaced with non-original asbestos shingles and several of its windows were replaced. It is a modest example of Craftsman style architecture, and the residence's setting has also been impacted by the construction of I-5 to the west. The residence is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**
The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Colonial Revival style. The primary façade is asymmetrically divided and two bays wide. It has a medium pitch hip roof with composition asphalt shingles and overhanging eaves. The exterior walls are clad with non-original asbestos shingles. The fenestration consists of a combination of both original and non-original wood windows throughout the residence.

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

**Statement of Significance:**
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1923 in the western portion of the University District, and now stands a few parcels east of I-5. The residence is a modest example of the Craftsman style and has fair integrity, due to several window replacements, including on the primary facade. The residence's setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**
The property contains a one and a half-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. The primary façade is symmetrically divided and three bays wide. It has a medium pitch side-gable roof with composition asphalt shingles, a shed roof dormer, and exposed structural elements. The exterior walls are clad with wood clapboard siding. The fenestration consists of original wood windows, many of which have been replaced. A detached garage stands north of the residence.

**Property potentially contributes to a historic district (National and/or local):** No

### Statement of Significance:

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1967 in the University District, and now stands a few parcels east of I-5. The building is a modest example of the Modern Googie style and has good integrity. However, it does not appear to embody characteristics or a method of construction that would warrant special recognition. The building’s setting has also been impacted by the construction of I-5 to the west, and it is not located in a cohesive neighborhood. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

### Description of Physical Appearance:

The property contains a one-story commercial building with a rectangular plan and platform frame wood construction. The building was originally designed with elements of the Modern Googie style. It has a low pitched front-gable roof with wide overhanging eaves, exposed rafter tails, and rolled composition roofing. The exterior walls are clad with a stucco finish. The primary facade is symmetrically divided and four bays wide. It features prominent plate glass windows. The window fenestration is composed of original metal windows. A detached metal sign is located on the property.

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

**Statement of Significance:**
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1908 in the western portion of the University District, and now stands a few parcels east of I-5. The residence has poor integrity because its exterior wall cladding was replaced with non-original asbestos shingles and its windows have been replaced. Because of these alterations, it no longer has the ability to convey historical significance. The residence's setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**
The property contains a one story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Queen Anne style. The primary façade is asymmetrically divided and two bays wide. It has a steeply pitched cross-gable roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with non-original asbestos shingles and wood siding. The fenestration consists of original wood and non-original aluminum windows throughout the residence.

**Engineer:**

Property appears to meet criteria for the National Register of Historic Places: Yes

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

**Statement of Significance:**

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It is estimated to have been constructed circa 1900 in the western portion of the University District, and now stands a few parcels east of I-5. The residence has good integrity and is an excellent example of the Queen Anne style in a small single family residence. It embodies the distinctive characteristics of this style and is a rare example of this building style and type in this area. Based on our evaluation, the property appears individually eligible for listing in the NRHP under Criterion C for its architectural design.

**Description of Physical Appearance:**

The property contains a one and a half-story single-family residence with a slightly irregular rectangular plan and platform frame wood construction. The residence was originally designed in the Queen Anne style. The primary façade is asymmetrically divided and two bays wide. It has a steeply pitched cross-gable roof with composition asphalt shingles and boxed eaves. The exterior walls are clad with wood clapboard siding and shingles. The fenestration consists of original wood windows throughout the residence.

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1908, and now stands a few parcels east of I-5. The residence is a modest example of the Craftsman style and has fair integrity, due to substantial changes to its front porch. The residence's setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance: The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed in the Craftsman style. It has a steeply pitched front-gable roof with overhanging eaves. The exterior walls are clad with wood clapboard siding and wood shingles. The primary facade is asymmetrically divided and three bays wide. The fenestration primarily consists of original wood windows, except at the altered front porch, which has been mostly enclosed.

1909 | Built Date

Architect: | Builder: 
--- | ---
Landscape Architect: | Engineer: 

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1909 in the western portion of the University District, and now stands a few parcels east of I-5. The residence has fair integrity because its exterior wall cladding was replaced with non-original asbestos shingles, and it is a modest example of Craftsman style architecture. The residence’s setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance:
The property contains a two-story single-family residence with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Craftsman and Colonial Revival styles. It has a steeply pitched front-gable roof with composition asphalt shingles, exposed structural elements, and overhanging eaves. The exterior walls are clad with non-original asbestos siding. The primary facade is asymmetrically divided and two bays wide. The fenestration is composed of original wood windows.

### Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1924 in the University, and now stands a few parcels east of I-5. The building has a vernacular plan and poor integrity, due to changes to its cornice and fenestration. The building’s setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

### Description of Physical Appearance:
The property contains a one-story commercial building with a rectangular plan and unreinforced masonry construction. The building has a vernacular design. It has a flat roof with a parapet and an altered cornice at the front elevation. The exterior walls are clad with a brick veneer. The primary facade is symmetrically divided and seven bays wide. The building's windows have been boarded-up.

Property appears to meet criteria for the National Register of Historic Places: No

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

Statement of Significance: The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1969 in the western portion of the University District, and now stands a few parcels away from I-5. The facility has good integrity, but is an industrial facility that is out of character with the surrounding neighborhood and does not appear to possess characteristics that warrant special recognition. Its setting has also been impacted by the construction of I-5 to the west. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

Description of Physical Appearance: The property contains a water treatment facility with associated equipment and two buildings. The first is a one-story building with a rectangular plan and concrete block construction. It has a utilitarian design, including a steeply pitched side gable roof covered with standing seam metal roofing. The exterior walls are clad with vertically oriented concrete bricks. The second is a one-story building with a rectangular plan and concrete block construction. The building was originally designed in the Modern style. It has a flat roof with overhanging eaves. The exterior walls are clad with a decorative concrete pebble treatment. The structure consists of a series of tanks, large pipes, and metal access stairwells surrounding by fence. The fence is clad with vertically oriented concrete bricks and glass block.

**Property appears to meet criteria for the National Register of Historic Places:** No

**Property is located in a potential historic district (National and/or local):** No

**Property potentially contributes to a historic district (National and/or local):** No

**Statement of Significance:**

The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was originally constructed in 1964 in the western portion of the University District, and now stands a few parcels east of I-5. The residence displays elements of the Craftsman and Tudor Revival styles, but appears to have been substantially remodeled. The residence's setting has also been impacted by the construction of I-5 to the west. It is not located in a cohesive neighborhood and does not appear to embody characteristics or a method of construction that would warrant special recognition. Based on our evaluation, the property appears ineligible for listing in the NRHP individually or as a contributing element to a historic district.

**Description of Physical Appearance:**

The property contains a one-story fourplex with a rectangular plan and platform frame wood construction. The residence was originally designed with elements of the Tudor Revival and Craftsman styles. It has a steeply pitched cross-gable roof with composition asphalt shingles and slightly overhanging eaves. The exterior walls are clad with wood shingles and a half-timbered stucco finish. The primary facade is asymmetrically divided and four bays wide. The window fenestration is composed of original wood windows.

Architect: Johanson, Perry

Builder:

Landscape Engineer:

**Property appears to meet criteria for the National Register of Historic Places:** Yes

Property is located in a potential historic district (National and/or local): No

Property potentially contributes to a historic district (National and/or local): No

**Statement of Significance:**
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1964 in the western portion of the University District, and now stands a few parcels east of I-5. The building is an unusual example of the Modern style and has good integrity. The building's setting has also been impacted by the construction of I-5 to the west and it is not located in a cohesive neighborhood. However, it appears to embody distinctive characteristics of the style and it is the design of a locally significant architect. Based on our evaluation, the property appears individually eligible for listing in the NRHP under Criterion C for its architectural design.

According to the University Friends representatives, "University Friends Meeting of the Religious Society of Friends (Quakers) 4001 9th Avenue NE, was built in 1963, after the University of Washington bought their Meeting House and Friends Center at 3959 15th Avenue NE where they had established their first University District presence in 1937. The current meetinghouse, designed by Perry Johanson in a Japanese style, also houses the regional offices of the American Friends Service Committee. University Friends Meeting has about 200 members."

**Description of Physical Appearance:**
The property contains a two two-story commercial buildings each with a rectangular plan and concrete construction. They are connected by covered corridors, which create a central courtyard between the two structures. The entire property was originally designed in the Modern style and exhibits Japanese influence. Both buildings have a low pitched hipped roof with a central rectangular cupola, composition shingles, and overhanging eaves. The exterior walls are clad in concrete block, bands of metal and glass windows, and vertically grooved wood siding. The primary facade is asymmetrically divided and multiple bays wide. The fenestration consists of original metal windows throughout the building.

Historic Property Inventory Report

Year Constructed | Work Type Description
--- | ---
1947 | Built Date

Architect: Builder: 
Landscape Architect: Engineer: 

Property appears to meet criteria for the National Register of Historic Places: No
Property is located in a potential historic district (National and/or local): No
Property potentially contributes to a historic district (National and/or local): No

Statement of Significance:
The property was evaluated at a reconnaissance level in a cultural resources survey completed for the SR520 I-5 to Medina: Bridge Replacement and HOV Project in the City of Seattle, King County, Washington. It was constructed in 1947 by Edmond F. Pugsley, a civil engineer, as an office and shop for his underground construction business as an excavating contractor. The building has a utilitarian design and fair integrity, due to changes to its fenestration. Located in the shadows of the University Bridge, this simple utilitarian structure was built by its owner in a largely industrial neighborhood on the north side of the Lake Washington Ship Canal. Boat building, repair, and moorage businesses predominated in the area. Pugley’s business remained in this location until his retirement in later 1960s. The City of Seattle acquired the building in October of 1971 for street purposes. The Seattle Engineering Department intended to use the property for a relocation of NE Pacific Street. Several years earlier, the Engineering Department had prepared cost estimates, designs, plans, and specifications, and had authorized the acquisition of the property necessary for the relocation of NE Pacific Street between Latona Avenue NE and 15th Avenue NE. The University of Washington would also share in the costs of the relocation. By the later 1970s, the Engineering Department had completed Phase I of the project from 15th Avenue NE to the University Bridge. However, the remaining section to NE Latona Avenue was never completed. The city currently leases this property for private use. Due to the loss of integrity of its setting, design, materials, feel and association, this small structure can no longer convey its historic significance and is not eligible for inclusion in the NRHP as a result.

Description of Physical Appearance:
The property contains a one-story commercial building with a rectangular plan and platform frame wood construction. The building exhibits a utilitarian style. It has a flat roof with coping. The exterior walls are clad with non-original T-1-11 siding. The primary facade is asymmetrically divided and two bays wide. The fenestration is composed of non-original windows.
