LTAP WSDOT Local Programs LTAP Center presents:

FHWA – NHI Modern Roundabouts: Intersections Designed for Safety

Course Description:
The modern roundabout improves the safety and operations of intersections. A well-designed modern roundabout reduces the frequency and severity of intersection crashes for all users including pedestrians and bicyclists. This course highlights the benefits of modern roundabouts and gives participants the knowledge needed to plan and consider applying roundabout intersection projects in their area. This is an introductory level course with a blend of technical and non-technical planning, design and operations considerations.

Outcomes:
Upon completion of the course, participants will know: Modern Roundabout from other types of circular intersections; Safety and Operational advantages of roundabouts; What type of locations roundabouts may be appropriate; Strategies to overcome common barriers to implementation of roundabouts, such as negative public perceptions; Key considerations when planning an area's first roundabout; How to apply basic traffic operational models and capacity calculations for roundabouts; Key geometric design principles of a modern roundabout; Signing and Marking suggested practices; Design Strategies for pedestrians and bicyclists.
