

ALTERNATIVE TRACTION DEVICES

Alternative Traction Device (ATD) means pneumatically driven chains which, when engaged, spin under the drive wheels automatically as traction is lost or a traction device differing from metal chains in construction, material or design but capable of providing traction equal to or exceeding that of such metal chains under similar conditions.

WAC 204-24-015

Please consult your vehicle's owner's manual or see what the manufacturer recommends whenever considering an alternative traction device.

The following are state-approved alternative traction devices.

AutoSock
